**Explanatory note**

*This note is not part of the regulations, but is intended to indicate their general effect.*

These regulations, which come into force on 1 January 2013, amend the Climate Change (Eligible Industrial Activities) Regulations 2010. The amendments change the electricity allocation factor from 0.52 to 0.537 and, as a consequence, replace the Schedule, which prescribes the eligible industrial activities and their emissions intensity, their products, and their allocative baselines (which depend on the electricity allocation factor).
