

Mr. Barnard.

HAWKE'S BAY RIVERS AMENDMENT.

[LOCAL BILL.]

ANALYSIS.

Title.	6. Board to have power to sell, lease, or otherwise dispose of lands.
Preamble.	7. Date of election altered
1. Short Title.	8. Allowance to Chairman.
2. Board authorized to carry out general scheme.	9. Board may pay expenses of Bill.
3. Power to vary scheme.	10. Repeal.
4. Power to borrow £250,000.	Schedule.
5. On poll, majority of votes carries proposal.	

A BILL INTITULED

AN ACT to amend the Hawke's Bay Rivers Act, 1919.

Title.

WHEREAS the Board is authorized by the Hawke's Bay Rivers Act, 1919, to borrow by way of special loan a sum or sums not exceeding
5 in the whole one hundred and fifty thousand pounds for the purpose of carrying into effect a general scheme of flood-prevention after the approval of the same by the Minister of Public Works: And whereas the Board has decided upon a general scheme of flood-prevention for the district, prepared by a qualified engineer, the estimated cost of which
10 scheme is two hundred and fifty thousand pounds: And whereas extended powers as hereinafter appear are required by the said Board for the more effective exercise of its functions:

Preamble.

BE IT THEREFORE ENACTED by the General Assembly of New Zealand in Parliament assembled, and by the authority of the same,
15 as follows:—

1. This Act may be cited as the Hawke's Bay Rivers Amendment Act, 1930, and shall be read together with and deemed part of the Hawke's Bay Rivers Act, 1919 (hereinafter called the principal Act).

Short Title.

2. The Board is authorized to execute and carry out the general
20 scheme of flood-prevention described in the Schedule hereto, and, as part of and for the purpose of such general scheme, to purchase such lands and to execute and do such ancillary works and things as the Board may consider proper.

Board authorized to carry out general scheme.

3. The Board may from time to time vary the said scheme, but
25 any variation of the said scheme shall first be approved by the Minister of Public Works before such variation shall be put into execution. Any variation of the said scheme shall for the purposes of this Act be deemed part of and comprised in the said scheme.

Power to vary scheme.

Power to borrow
£250,000.

4. For the purpose of carrying into effect the said scheme or any part thereof the Board may borrow by way of special loan under the Local Bodies' Loans Act, 1926, any sum, or from time to time any sums, not exceeding in the whole two hundred and fifty thousand pounds.

On poll, majority of
votes carries
proposal.

5. On the taking of any poll of ratepayers on a proposal to borrow the said sum of two hundred and fifty thousand pounds or any portion thereof, a majority of the valid votes recorded shall suffice to carry the proposal.

Board to have
power to sell, lease,
or otherwise
dispose of lands.

6. (1) The Board shall have power to sell, lease, or otherwise dispose of any land from time to time belonging to it.

(2) All proceeds derived by the Board from any such sale, lease, or other disposition shall be applied, in the discretion of the Board, towards one or more of the following purposes :—

(a) The partial or total redemption of the principal or interest of any special loan raised by the Board under the Local Bodies' Loans Act, 1926.

(b) The payment for any new river-works to be thereafter executed by the Board.

(c) The payment of compensation or the purchase price for any land taken or purchased or to be taken or purchased by the Board.

(d) The payment of compensation for damaging or injuriously affecting any land or property in the exercise of its powers.

(3) Where any land is sold under the power given by this section which was at the time of such sale held by the Board for the purpose of any public work, or for any particular purpose or purposes, and such public work has not been carried out, or such particular purpose or purposes have not been fulfilled, all moneys received by the Board upon such sale shall be applied to the purchase of other lands to be held for the same purposes as affected the lands so sold, or in the reduction of any loan out of which such lands were purchased.

Date of election
altered.

7. Section nine of the principal Act is hereby amended by omitting the words "second Tuesday in January" where those words last occur in that section, and substituting the words "third Wednesday in May".

Allowance to
Chairman.

8. The Chairman may be paid such annual allowance, not exceeding one hundred pounds, out of the funds of the Board as the Board from time to time fixes in addition to any refund of expenses under section twenty-three of the principal Act.

Board may pay
expenses of Bill.

9. The Board may pay out of the funds of the Board all costs and expenses incurred by it of and incidental to the promotion and the preparation and passing through Parliament of any Bill which affects or concerns the rights, powers, and authorities of the Board or any scheme for flood-prevention within the Board's district.

Repeal.

10. Section twenty of the Hawke's Bay Rivers Act, 1919, is hereby repealed.

SCHEDULE.

Schedule.

NGARURORO FLOOD-CONTROL WORKS.

THE works are designed to increase the discharge-capacity of the Ngaruroro, and provide a spillway so that the whole of the flood-waters will be retained in defined channels to the sea.

From Fernhill Bridge to river chainage 5 miles 50 chains, stop-banks 1,100 ft. apart are to be built on each side of the river.

At river chainage 5 miles 50 chains the left stop-bank swings to the north and forms the western bank of a flood overflow-channel or spillway. The eastern bank of the spillway leaves the left bank of the Ngaruroro at river chainage 4 miles 70 chains. All flood-waters rising above the level of the natural bank of the river between 4 miles 70 chains and 5 miles 50 chains spill down the overflow-channel into the diversion-channel of the Tutaekuri, and thence under the Washout Railway-bridge to the sea via the new mouth to be made for the Tutaekuri. As a safeguard in case of combined floods in the Tutaekuri and Ngaruroro overtaking the capacity of the flood-overflow channel, it is proposed to build the stop-bank on the eastern side of this channel, immediately opposite the Waitangi Railway-bridge 1 ft. below grade, so that excess flood-waters may get away through the Waitangi outlet into the sea via the Ngaruroro mouth. Below 4 miles 70 chains the existing channel of the Ngaruroro is to be stop-banked and improved in alignment. The Whakatu Railway-bridge is to be lengthened 250 ft. and raised 2 ft. The scheme provides for new traffic-bridges as necessitated by the scheme. The mouth of the old Ngaruroro is to be flood-gated and flood-gates having capacity for 10,000 cusecs. are to be provided. It is proposed to build gates having 500 square feet of waterway at first, but to make provision in the design for building the remainder of the gates at a later period.

TUTAEKURI FLOOD-CONTROL WORKS.

The works are designed to improve the discharging-capacity of the Tutaekuri River, to protect the banks and rectify the alignment of the present course from Moteo (12 miles) to Powdrell's Bend (3 miles 40 chains). At Powdrell's Bend it is proposed to divert the whole of the Tutaekuri River southwards by a new channel, by which the river will be discharged under the Washout Railway-bridge to a new mouth through the shingle-beach opposite into the sea. The work at Moteo consists of stop-banking the right bank from Puketapu Bridge 140 chains up-stream and improving the channel. Below Puketapu and down to Redcliff Bridge works for protecting the banks and improving the alignment of the river are proposed. From Redcliff Bridge (5 miles 42 chains) to Powdrell's Bend (3 miles 48 chains) the existing channel is to be improved by the building of stop-banks, by clearing willows, protecting the banks and rectifying the alignment. From Powdrell's Bend (3 miles 48 chains) to the sea a pilot channel is to be made in the centre, and high stop-banks built 900 ft. apart on the margin of the diversion channel. The Washout Railway-bridge is to be strengthened to allow for a 15-ft.-deep channel, and protected. Works consisting of a mole to hold the new mouth in place, and of a dam to separate the proposed Tutaekuri mouth from the mouth of the Ngaruroro, are provided for.

TUKITUKI, OLD NGARURORO, AWANUI, AND TUTA EKURI-WAIMATE IMPROVEMENT WORKS.

The works include straightening stop-banks on the Tukituki River, lowering and straightening the old Ngaruroro River bed and the Awanui Stream, lowering and straightening the course of the Tutaekuri-Waimate Stream.
