EXPLANATORY NOTE

Clause 1 relates to the Short Title and commencement.

Clause 2: The purpose of this clause is to revoke the setting apart as State forest of the various areas of land specified in the clause, and to declare them to be Crown land subject to the Land Act 1948.

The land described in *subclause (3) (j)*, comprising about 1167 hectares, is the Mt Robertson State Forest approximately 24 kilometres north of Blenheim. The land is affected by a major adjustment exercise involving Crown and State forest land. To conform to existing uses an area of 180 hectares that is commercial exotic forest is to continue to be leased to the adjoining owner, and the remaining 987 hectares, being native bush, is to be added to the adjoining Robertson Range Scenic Reserve.

The land described in *subclause (3) (k)*, comprising about 26 hectares, is State forest land that was formerly part of the North-west Nelson State Forest Park in the Granite Creek area and is approximately 10 kilometres south-east of Karamea. The land described in *subclause (3) (l)*, comprising about 4 hectares, forms part of the Paparoa State Forest approximately 42 kilometres north-east of Greymouth. The area is part of the bed of the Slatey Creek, and is required to facilitate the extension of public access through land to be disposed of to the adjoining owner by way of exchange.

The land described in *subclause (3) (l)*, comprising about 4 hectares, forms part of the Paparoa State Forest approximately 42 kilometres north-east of Greymouth. The area, comprising rough grazing and scrub, is to be disposed of to the adjoining lessee for farming purposes as part of an exchange proposal.

Clause 3 relates to the Kaitaia Drainage Area. Section 14 of the Reserves and Other Lands Disposal Act 1968 makes provision for the transfer of the control of works known as "the existing drainage system" and "the new works" to the Mangonui County Council. The 2 works themselves are to vest in the Council once debentures have been issued in favour of the Crown. In the case of the existing drainage system, the control has been transferred and the debenture has been issued. This process has not been followed yet for the new works.

This clause amends the 1968 provisions by providing for the transfer of the control of special works and the special works themselves to the Mangonui County Council. The special works are works that were carried out in the period 1972 to 1981 following floods in 1971 that revealed inadequacies in the flood protection afforded by the new works which were then nearly completed.

The clause provides for the transfer of the special works at the same time as the new works are transferred. However, no debenture is required in respect of the special works before they are vested in the Council. Because some of the special works are an improvement of the new works they cannot be transferred at any time other than that when the new works are transferred. The transfer of the special works is therefore conditional upon a debenture being issued in respect of the new works.

The clause also provides that the rating provisions of the 1968 provision that apply in respect of the existing drainage system and the new works are also to apply in respect of the special works.

Changes are made to the provisions relating to the classification for rating purposes of land in the rural subdivision of the Drainage Area. At present, the Council is required to make a fresh classification of the land on the request of not less than one-half of the occupiers of the land or on the request of the occupiers of not less than one-half of the land. The clause requires the Council to make a fresh classification of all land in the rural subdivision of the Drainage Area, irrespective of any requests or lack of requests from the occupiers of that land. That classification will apply to land that is liable to be rated in respect of the special works, as well as that which at present is liable to be rated in respect of the existing drainage system and the new works.

The classification must be made before 31 March 1986, and the cost of the fresh classification is to be met by the Crown.

Clause 4 vests in the Crown as a recreation reserve 650 square metres of tidal mud flat land that is at present held by the Northland Harbour Board as part of an endowment. The land is at the end of Matauwhi Road adjacent to Matauwhi Bay, Russell, and the adjoining land is a recreation reserve.

Clause 5 vests 32 square metres of Crown land as a historic reserve under the Reserves Act 1977. It also provides that the provisions in the Reserves and Other Lands Disposal Act 1979 relating to the leasing of the adjoining reserve are to apply to that land.

The land adjoins the Customhouse at Auckland and the Customhouse building encroaches upon it.

Clause 6 relates to land adjacent to the foreshore in the Marlborough Sounds. The clause replaces section 17 of the Reserves and Other Lands Disposal Act 1955 and applies to all land in the area that is public or Government road, land reserved from sale under section 58 of the Land Act 1948, or public reserves. The present provision applies only to specified land in those categories.

A number of other changes are made—

- The approval of the Minister of Works where the land is a public road is no longer required:
- Specific provision is made that the section is not to apply to any land that is not vested in the Crown:
- Local authorities are empowered to transfer any reserves in the area vested in them to the Crown so that the provisions of the section may apply to them:
- The power conferred by the present provision to make regulations has never been exercised, and is omitted from this clause.

Clause 7 relates to land at Cloudy Bay, about 5 kilometres north-east of Blenheim. The clause deals with 2 separate matters relating to the land.

The first concerns land that was either laid out as road on Crown grants or was proclaimed to be road in 1886. That land has legal road status but it has never been developed or used as road. In surveys done in 1905, 1906, and 1922 the road status was not recognised, and the land was included in surveyed sections for which titles were issued as if the land did not have road status.

In the surveys mentioned above, other land was shown as roads, but the necessary steps were not taken to legalise them.

The effect of the clause is to cancel the road status of the portions of the Crown grant roads and the land proclaimed to be road in 1886. The cancellation takes effect on 1 September 1905, which is before the date on which the land was first dealt with as if they were not roads. Those roads that were shown as roads in the surveys of 1905, 1906, and 1922 but not legalised as roads are deemed to be legal roads.

The second matter dealt with is the incorrect inclusion of Crown land in freehold sections, and the inclusion in Crown land of some land that is not Crown land. The effect of the clause is to give that land the status of the land within which they were incorrectly included with effect on and from the dates on which they were incorrectly included. The owners of the land affected have consented to this course being followed.

Clause 8 relates to land in Ward that were laid off as road in 1905. The land was later included in Crown licences and leases or reserved, and in one case freeholded, as if the land did not have road status but were Crown land like the adjoining land.

The effect of the clause is to deem the road status to have been uplifted on 1 May 1906, which is a date before the date on which any of the land was dealt with. Provision is also made to ensure that the validity of any action involving the land is not to be affected by the fact that the land had road status.

Clause 9 relates to land in the Kincaid Run near the Hapuku River Bridge on State Highway 1, about 10 kilometres north of Kaikoura, that was taken for public roads in 1892. The land was subsequently subject to dispositions and reservations as if it had not been taken for public roads, but had the same status as the adjoining land.

The effect of the clause is to deem any road status to have been cancelled on 1 August 1906. Provision is also made to ensure that the validity of any action involving the land is not to be affected by the fact that the land may have had road status.

Clause 10 relates to land near the Hapuku River Bridge on State Highway 1, 10 kilometres north of Kaikoura. The clause deals with several separate matters relating to the land.

The first concerns land that was taken and laid off as roads in 1885 or earlier by Crown grant. That land has legal road status but it has never been developed or used as road. In subdivisions in 1898 and 1914 the road status was not recognised, and the land was included in sections for which titles were issued as if the land did not have road status. The clause cancels the road status of that land with effect from 19 May 1914.

In 1898 and 1914 roads were laid out over land that is a reserve (resting place for stock). Those roads were never legalised and they are still in use. The clause gives those roads legal status.

Portions of that reserve have also been included in freehold sections without the revocation of the reserve status of the land. The clause revokes the reserve status of the land that has been included in the freehold sections, with effect from a date before the date on which the land was so included.

From time to time Proclamations have been made taking land in the area for railway purposes without recognising that some of that land had legal road status or reserve status. That road or reserve status is cancelled by this Bill, and the Proclamations are deemed to be as valid as they would have been if the land had never had that road or reserve status.

Clause 11 relates to land in the Swyncombe, Lynton Downs, and Fernleigh areas, on State Highway 70, between 10 and 20 kilometres west of Kaikoura.

Roads were set apart in the Swyncombe Run during the period 1864 to 1869 while the land was first being granted but these were not recognised when the area was subdivided in 1887. From 1887 the original roads have been incorrectly included in titles. The clause cancels the road status of that land with effect from 27 July 1887.

The 1887 subdivision also set out a new pattern of roads that were formed and are still used as roads but have never been legalised. The clause deems those roads to be roads within the meaning of the Public Works Act 1981.

Clause 12: This clause deals with the Westland-Grey Coal Reserve that originally comprised about 2023 hectares. The Westland and Nelson Coal Fields Administration Act 1877 made provision for the administration of the Reserve, and the Greymouth Harbour Board Act, 1884 endowed the Greymouth Harbour Board with all money arising or derivable from the Reserve. However, the land remained vested in the Crown.

The principal effect of this clause is to vest most of the Reserve (approximately 1763.7 hectares) in the Greymouth Harbour Board.

Approximately 260 hectares of the Reserve are not vested in the Greymouth Harbour Board, and this land comprises:

- Land taken or set aside under other legislation:
- All rivers and streams over 3 metres in width:
- A 20 metre wide strip along both banks of such rivers and streams:
- 3 areas of land that lie between State Highway 7 and the Midland Railway:
- 6 sections in Dobson that are specifically dealt with by this clause.

Rights in respect of minerals and coal are reserved to the Crown.

The clause also corrects transactions involving 6 sections in Dobson that are irregular because they are based on an assumption that the Reserve was, at that time, vested in the Greymouth Harbour Board.

In 1973 the 2 sections described in subclause (17) of this clause were declared by Warrant to be subject to the Land Act 1948. At that time they were already Crown land subject to the Land Act, but the Warrant was issued on the erroneous assumption that they were vested in the Greymouth Harbour Board. Leases were granted under section 63 of the Land Act in respect of those sections. The power to grant those leases is in doubt because the Greymouth Harbour Board had been given leasing powers in respect of the Reserve by special legislation in 1902. The leases granted under the Land Act conferred upon the lessees the right to acquire the freehold interest in the leased land and the lessees of one of the sections has exercised that right. The clause confirms that there was power to grant the leases under the Land Act and the consequence of this is that the rights to acquire the freehold interest in the leased land are confirmed. The net rents and the net proceeds of any sale of the leased section that has not been freeholded are payable by the Land Settlement Board to the Greymouth Harbour Board.

In 1975 the Land Settlement Board purported to purchase the 4 sections described in subclause (15) from the Greymouth Harbour Board. That transaction was of no effect because the land was already Crown land. The Land Settlement Board subsequently granted deferred payment licences in respect of 2 of those sections and this clause provides that the validity of those licences is unaffected by the irregularity of the purported purchase of the land from the Greymouth Harbour Board.

The Greymouth Harbour Board Empowering Act, 1894 is repealed. The Act empowers the Greymouth Harbour Board to spend royalties received from coal on prospecting for coal or subsidising such prospecting. The provisions of the Act have not been invoked for many years.

Consequential amendments are made to other Acts.

Clause 13 excludes an area of 6908 square metres from the Arthur's Pass National Park. The land has been grazed for many years and does not meet the criteria established for National Park status.

Clause 14 excludes an area of 8.5970 hectares from the Westland National Park. The land has been fenced from the Park and farmed for many years. It does not meet the criteria established for National Park status.

Clause 15 authorises and directs District Land Registrars to take such action as may be necessary to implement the provisions in the Bill.
