

**1972/229**

## THE FRESHWATER FISH FARMING REGULATIONS 1972

DENIS BLUNDELL, Governor-General

### ORDER IN COUNCIL

At the Government House at Wellington this 24th day of October 1972

Present:

HIS EXCELLENCY THE GOVERNOR-GENERAL IN COUNCIL

PURSUANT to the Fisheries Act 1908, His Excellency the Governor-General, acting by and with the advice and consent of the Executive Council, hereby makes the following regulations.

#### ANALYSIS

1. Title and commencement
2. Interpretation
3. Scope of regulations

#### PART I

##### LICENSING OF FISH FARMS AND PROCESSING PLANTS

4. Fish farms to be licensed
5. Applicant to obtain right to take or discharge water required by Water and Soil Conservation Act 1967
6. Applications for licences
7. Issue and conditions of licence
8. Conditions as to discharge of effluents
9. Notice of grant of licence
10. Duration of licence
11. Renewal of licence
12. Transfer of licence
13. Carrying on of fish farm by personal representative of deceased licensee, etc.
14. Licence to be displayed
15. Fees

#### PART II

##### OPERATION OF FISH FARMS AND PROCESSING PLANTS

16. Sale and possession of fish
17. Only fish raised or lawfully transferred to be on fish farm
18. Fish not to be canned

19. Fish to be sold in whole state only and to be tagged
20. Fish to be cooked and served with tag
21. Sale of fish to other fish farms
22. Animal material to be sterilised
23. Licensee to keep records and make returns
24. Records to be maintained
25. No fishing on fish farms

#### PART III

##### DISEASE CONTROL

26. Licensee to give notice of disease
27. Preventive or remedial action
28. Destruction of brood fish when genetic defects develop
29. No compensation for fish destroyed
30. Expenses incurred in destroying diseased fish and decontaminating ponds, etc.
31. Diseased fish not to be transferred
32. Officers may take specimens for examination

#### PART IV

##### MISCELLANEOUS PROVISIONS

33. Inspection of fish farms
34. Notices
35. Obstructing officer
36. Offences
37. Cancellation of licence on conviction Schedules

## REGULATIONS

**1. Title and commencement**—(1) These regulations may be cited as the Freshwater Fish Farming Regulations 1972.

(2) These regulations shall come into force on the day after the date of their notification in the *Gazette*.

**2. Interpretation**—(1) In these regulations, unless the context otherwise requires,—

“Acclimatisation district” means the district of an acclimatisation society:

“Acclimatisation society” means an acclimatisation society registered under the Wildlife Act 1953:

“The Act” means Part II of the Fisheries Act 1908:

“Authorised officer” means an officer with appropriate specialist qualifications authorised in writing to act by the Director-General of Agriculture and Fisheries:

“Brood fish” means male or female fish kept on a fish farm for breeding purposes:

“Canned” means heat treated in hermetically sealed cans or jars or other containers; and “to can” has a corresponding meaning:

“Disease”, in relation to fish, means any disease specified in the First Schedule or Second Schedule to these regulations; and

“diseased” has a corresponding meaning:

“Fish” means any of the following, whether alive or dead:

(a) Brown trout (*Salmo trutta*):

(b) Rainbow or steelhead trout (*Salmo gairdneri*):

(c) American brook trout or char (*Salvelinus fontinalis*):

(d) Atlantic salmon (*Salmo salar*):

(e) Quinnat salmon (*Oncorhynchus tshawytscha*):

(f) Sockeye salmon (*Oncorhynchus nerka*):

(g) Eels (*Anguilla dieffenbachii* and *Anguilla australis*):

(h) Freshwater crayfish or koura (*Paranephrops planifrons* and *Paranephrops zealandicus*);—

and includes any variety or sub-species of those fish; and also includes the young, fry, ova, or spawn, and any part of those fish; but does not include salmon that is preserved in cans and imported into New Zealand:

“Fish farm” means an establishment for the raising and sale of fish; but does not include any hatchery established and operated by an acclimatisation society or by the Ministry of Agriculture and Fisheries or by the Department of Internal Affairs:

“Licence” means a fish-farm licence or other licence issued under these regulations; and “licensed” and “licensee” have corresponding meanings:

“Officer” means an officer appointed under the Act for the purposes of these regulations:

“Production record”, in relation to any fish farm, means a yearly return of fish in a form required by the Director-General of Agriculture and Fisheries:

“Sales record”, in relation to any fish farm or other business, means a return of fish sold by the licensee in a form provided by the Director-General of Agriculture and Fisheries:

“Tag” means a coded metal or plastic tag purchased from, or approved by, the Ministry of Agriculture and Fisheries:

“Waters” means New Zealand fisheries waters as defined in subsection (1) of section 78 of the Fisheries Act 1908; and includes artificial waters and private waters:

“Year” means a period of 12 months ending with the 31st day of December:

(2) No provision of any other regulations under the Act shall apply to any fish raised on or transferred to a fish farm duly licensed under these regulations.

**3. Scope of regulations**—No licence shall be issued under these regulations permitting any fish farm, or any processing plant for the purposes of processing the produce of any fish farm, to be established in the Taupo Trout Fishing District or in the County of Rotorua.

## PART I

### LICENSING OF FISH FARMS AND PROCESSING PLANTS

**4. Fish farms to be licensed**—(1) No person shall establish or operate any fish farm except pursuant to a fish-farm licence granted by the Minister under these regulations and for the time being in force and in accordance with the conditions of the licence and with the provisions of these regulations.

(2) No person shall process or deal in any produce of a fish farm except pursuant to a fish-farm licence, or a licence to process or deal in the produce of a fish farm, granted by the Minister under these regulations and for the time being in force and in accordance with the conditions of the licence and with the provisions of these regulations.

**5. Applicant to obtain right to take or discharge water required by Water and Soil Conservation Act 1967**—(1) Before any person applies for a fish-farm licence, he shall obtain under the provisions of the Water and Soil Conservation Act 1967 any right required by that Act in respect of any water required for, or affected by, the proposed fish farm. Forthwith after making application for any such right, he shall give notice in writing thereof to the acclimatisation society in whose district the proposed fish farm will be situated and each acclimatisation society into whose district water from the proposed farm may be discharged. If the proposed fish farm will be situated in the Rotorua Trout Fishing District or the Southern Lakes Acclimatisation District, or water from the proposed farm may be discharged into either of those districts, or into the Taupo Trout Fishing District, he shall give notice in writing thereof to the Secretary for Internal Affairs.

(2) Where any person is granted any right referred to in subclause (1) of this regulation, the acclimatisation society or, as the case may be, the Secretary for Internal Affairs, may, within 21 days after public

notification is made under the Water and Soil Conservation Act 1967 of the granting of that right, make written submissions to the Director-General of Agriculture and Fisheries in relation to the application for a fish-farm licence.

**6. Applications for licences—**(1) Every application for a fish-farm licence, or a licence to process or deal in the produce of a fish farm, shall be made in writing to the Director-General of Agriculture and Fisheries in a form provided by him.

(2) Every application for a fish-farm licence shall specify the kind of fish intended to be raised on the fish farm.

(3) Every application for a fish-farm licence shall be accompanied by plans (in duplicate) showing—

- (a) The location of the proposed fish farm and all premises associated with the farm for processing or dealing in its produce;
- (b) The layout of all ponds and buildings;
- (c) All intake and outlet structures, where applicable;
- (d) The source of the water to be used, the flow pattern of the water through the fish farm, and the location of outflows.

(4) In every application for a fish-farm licence, the applicant shall specify his right to occupy the area of the proposed fish farm, and shall supply sufficient evidence that all rights, licences, and other authorities required by any enactment authorising him to draw water from and return water to any lake or river or stream, to take or discharge water into the sea, and to occupy any foreshore have been duly granted and are in force.

(5) The Director-General of Agriculture and Fisheries may require the applicant for any licence that may be issued under these regulations to supply such further information of any kind as the Director-General may consider relevant and require, which, in the case of an applicant for a fish-farm licence, may include information concerning the suitability for the purpose of the waters proposed to be used as a fish farm, the methods proposed to be adopted in operating the fish farm, and the suitability of the applicant, having regard to his qualifications, experience, and resources, to operate the fish farm. Until that information is supplied, the Minister shall be under no obligation to give any further consideration to any application.

**7. Issue and conditions of licences—**(1) It shall be in the discretion of the Minister to grant or refuse any application for a licence:

Provided that before determining any application for a licence, the Minister shall take into account—

- (a) Any written submissions in relation to the application made under subclause (2) of regulation 5 of these regulations to the Director-General of Agriculture and Fisheries by an acclimatisation society or by the Secretary for Internal Affairs; and
- (b) The qualifications, previous training, and experience of an applicant for a fish-farm licence to operate a fish farm and, in the event that a fish farm is to be managed by a manager, the qualifications, previous training, and experience of the manager; and

- (c) In the case of an application for a fish-farm licence, the situation of the proposed fish farm and the applicability of the principles of good farming practice to it.
- (2) Every licence shall be in a form provided by the Minister, and shall be signed by him.
- (3) It shall be a condition of every fish-farm licence, whether specified in the licence or not, that—
- (a) All rights, licences, and authorities required by any enactment relating to the use or discharge of water in the operation of the fish farm shall be kept in full force and effect so long as fish-farming operations are carried out under the licence; and
- (b) Means shall be provided to ensure that water can be supplied to every pond on the fish farm without previously passing through any other pond on the fish farm and that it cannot be discharged without being treated by such process as shall be approved in the circumstances of each case by the Director-General of Agriculture and Fisheries; and
- (c) During the continuance of the licence the fish farm shall be operated personally by the licensee or by a suitably qualified farm manager approved by the Minister.
- (4) Subject to the provisions of subclause (3) of this regulation, the Minister may grant any licence subject to such conditions as he, in his discretion, thinks fit. Those conditions shall be specified in the licence.
- (5) Every fish-farm licence shall specify the kind of fish that may be raised pursuant to the licence and if there is more than 1 kind of fish, shall also specify whether they are to be segregated.
- (6) Every fish-farm licence shall specify by what means any fish offal shall be disposed of by the licensee.

**8. Conditions as to discharge of effluents**—Without limiting the provisions of subclause (4) of regulation 7 of these regulations, the Minister shall, where practicable, make it a condition of every fish-farm licence that, subject to compliance by the licensee with any requirements of the Water and Soil Conservation Act 1967, and with the terms of any right granted under that Act to the licensee, all effluents from the fish farm shall, after being treated as mentioned in paragraph (b) of subclause (3) of regulation 7 of these regulations, be discharged into the sea or into estuarine waters or, where that is not practicable, shall be further treated and disposed of in a manner specified by the Minister.

**9. Notice of grant of licence**—Notice of the granting of every licence shall be published by the Director-General of Agriculture and Fisheries in the *Gazette*.

**10. Duration of licence**—(1) Every licence shall, unless it is sooner cancelled or suspended in accordance with these regulations, continue in force until the expiration of the term, not exceeding 14 years, for which it is issued, and may from time to time be renewed by the Minister, in a form provided by him and signed by him, for a further term not exceeding 14 years.

(2) Notwithstanding that any licence is issued or renewed for any term, the conditions on which the licence is held by the licensee may at any time during that term be changed on written notice being given to him of the changed conditions by the Minister. Subject to subclause (3) of regulation 7, the conditions may be changed by the addition of new conditions or the revision or omission of existing conditions as the Minister thinks fit.

**11. Renewal of licence—**(1) Any application for the renewal of a licence shall be made to the Director-General of Agriculture and Fisheries in writing in a form provided by him, and shall be made not earlier than 12 months, and not later than 3 months, before the date of expiry of the licence.

(2) Unless the Minister is satisfied that the licensee has failed to comply with the conditions of the licence, the Minister shall grant the application for a renewal of the licence:

**Provided that—**

(a) The Minister, in his discretion, may grant the renewal subject to such conditions, either in addition to or in substitution for those to which the licence is for the time being subject, and the additional or substituted conditions shall be endorsed on or annexed to the licence, which shall be subject to those conditions accordingly:

(b) The Minister shall not grant the renewal unless he is satisfied that all rights, licences, and other authorities required by any other enactment authorising the licensee to draw water from and return water to any lake or river or stream, to discharge water into the sea, and to occupy any foreshore have been duly granted and are in force.

(3) The Minister may, in his discretion, determine any application for renewal of a licence, notwithstanding that the application may not have been made within the time limited by this regulation in that behalf, provided the application was made not later than the date of expiry of the licence.

(4) If application for the renewal of a licence is made as aforesaid but is not determined on or before the expiry of the licence, the licence shall be deemed to be extended until the application is decided by the Minister.

**12. Transfer of licence—**(1) Any person, being—

(a) The licensee; or

(b) The personal representative of a deceased licensee; or

(c) The manager under the Mental Health Act 1969 of the estate of a licensee; or

(d) In the case of a licensee in respect of whom a protection order is in force under the Aged and Infirm Persons Protection Act 1912, the manager of his estate; or

(e) The assignee in bankruptcy of a licensee who has been adjudged a bankrupt; or

(f) The liquidator of a company which is a licensee,—  
may transfer the licence to any person approved in writing by the Minister in that behalf.

(2) Application for approval of a transfer under this regulation shall be made in writing to the Director-General of Agriculture and Fisheries in a form provided by him.

(3) The Minister shall approve an application for his approval of a transfer of a fish-farm licence or a licence to process the produce of a fish farm if he is satisfied that the proposed transferee, having regard to his qualifications, experience, and resources, is a suitable person to operate the fish farm or processing plant:

Provided that the Minister shall not approve any such transfer unless he is satisfied that all licences and other authorities required by any other enactment authorising the proposed transferee to draw water from and return water to any lake or river or stream, to discharge water into the sea, and to occupy any foreshore have been duly granted and are in force.

(4) No transfer of a licence shall have any force or effect unless and until it is approved by the Minister under this regulation.

**13. Carrying on of fish farm by personal representative of deceased licensee, etc.—**(1) Any person, being—

(a) The personal representative of a deceased licensee; or

(b) The manager under the Mental Health Act 1969 of the estate of a licensee; or

(c) In the case of a licensee in respect of whom a protection order is in force under the Aged and Infirm Persons Protection Act 1912, the manager of his estate; or

(d) The assignee in bankruptcy of a licensee who has been adjudged a bankrupt; or

(e) The liquidator of a company which is a licensee,—  
may, with the consent in writing of the Director-General of Agriculture and Fisheries, operate or appoint some other person to operate the fish farm, processing plant, or other premises, to which the licence relates for such period as the Director-General of Agriculture and Fisheries determines.

(2) While any person operates a fish farm, processing plant, or other premises pursuant to this regulation, he shall, for the purposes of these regulations, be deemed to be the holder of the licence.

**14. Licence to be displayed—**The licensee shall cause his licence and any renewal thereof, together with any notice of change in terms of the licence as issued or renewed, for the time being in force, to be displayed in a prominent place at the fish farm, or, in the case of a licence held solely for the purposes of processing or dealing in the produce of a fish farm, at the licensee's chief place of business.

**15. Fees—**The fee for every fish-farm licence shall be the annual fee of \$200 to be paid by the licensee into the Public Account by remitting it to the Director-General of Agriculture and Fisheries in advance for each year in which a licence is held or deemed to be extended.

## PART II

## OPERATION OF FISH FARMS AND PROCESSING PLANTS

**16. Sale and possession of fish**—Subject to these regulations, it shall be lawful for any licensee to be in possession of, sell, or otherwise dispose of fish raised on or transferred to a fish farm and for any other person to be in possession of any such fish sold or otherwise disposed of.

**17. Only fish raised or lawfully transferred to be on fish farm**—  
(1) Subject to subclauses (2) and (3) of this regulation, the licensee of a fish farm shall not keep any fish on that farm, unless the fish has been raised on the fish farm, or, with the approval of the Director-General of Agriculture and Fisheries, has been transferred to the fish farm from another licensed fish farm.

(2) Subject to regulation 31 of these regulations, with the approval of the Director-General of Agriculture and Fisheries, and of the acclimatisation society in whose district any licensed fish farm is situated and of any acclimatisation society through whose district water from the fish farm is discharged, and of the acclimatisation society that operates any hatchery from which it is proposed to transfer any fish to the fish farm, fish may be transferred to the fish farm from the hatchery.

(3) Subject to regulation 31 of these regulations, with the approval of the acclimatisation society in whose district any licensed fish farm is situated and of any acclimatisation society through whose district water from the fish farm is discharged, any fish may, for experimental purposes under the direct control of the Director-General of Agriculture and Fisheries, be transferred to the farm or released alive from the farm, otherwise than in accordance with the said subclause (1).

(4) This regulation shall not apply to the licensee of any fish farm used exclusively for farming eels.

**18. Fish not to be canned**—(1) No licensee shall—

- (a) Can any fish raised on or transferred to the fish farm; or
- (b) Be in possession of any such fish preserved in cans.

(2) This regulation shall not apply to the licensee of any fish farm used exclusively for farming eels.

**19. Fish to be sold in whole state only and to be tagged**—(1) Subject to subclauses (1) to (3) of regulation 17, and to regulation 21, of these regulations, no licensee shall sell or otherwise dispose of any fish, unless—

- (a) It is dead, and in the whole state except that it may be gilled, gutted, boned, scaled, and skinned; and
- (b) It is labelled with a tag.

(2) This regulation shall not apply to eels or freshwater crayfish, nor to any fish ova sold directly for export with the authority of the Director-General of Agriculture and Fisheries.

**20. Fish to be cooked and served with tag—**(1) No one shall possess, cook, or serve, in any restaurant, hotel, or other public eating place, any fish raised on any fish farm, unless—

(a) It is dead, and in the whole state except that it may be gilled, gutted, boned, scaled, and skinned; and

(b) It is labelled with a tag.

(2) This regulation shall not apply to eels or freshwater crayfish.

**21. Sale of fish to other fish farms—**Subject to regulation 31 of these regulations, the licensee of any fish farm may, with the consent in writing of the Director-General of Agriculture and Fisheries, sell or otherwise dispose of any live fish to the licensee of any other fish farm.

**22. Animal material to be sterilised—**(1) No person shall feed any animal material to fish on any fish farm, unless the animal material has been sterilised—

(a) By heating it throughout for not less than 30 minutes at a temperature of at least 120°C; or

(b) By boiling it for not less than 2 hours; or

(c) By some other equally efficient method of sterilisation approved by the Director-General of Agriculture and Fisheries.

(2) Notwithstanding anything in subclause (1) of this regulation, unsterilised animal material may, with the approval of the Director-General of Agriculture and Fisheries and subject to such conditions as he may specify, be fed to fish on fish farms.

(3) This regulation shall not apply to the feeding of animal material to eels or freshwater crayfish unless the eels or freshwater crayfish are fed with fish.

**23. Licensee to keep records and make returns—**(1) The licensee of a fish farm shall keep full records, in a form approved by the Director-General of Agriculture and Fisheries, of all fish raised on or transferred to the fish farm and of all fish sold or otherwise disposed of by the licensee, and shall make those records available for inspection by any officer at all reasonable times.

(2) Not later than the 15th day of each month, the licensee of a fish farm shall forward to the Director-General of Agriculture and Fisheries a sales record showing the fish sold or otherwise disposed of by the licensee during the immediately preceding month.

(3) Not later than the last day of February in each year after the first year of the currency of the licence, the licensee of a fish farm shall forward to the Director-General of Agriculture and Fisheries a production record for the immediately preceding year.

(4) In so far as this regulation applies to fish farms used exclusively for eels or freshwater crayfish no record of the numbers of the eels or freshwater crayfish need be kept, but records shall be kept of all transactions in respect of those eels and freshwater crayfish.

**24. Records to be maintained—**(1) Every person carrying on the business of processing or dealing in fish from any fish farm shall maintain in such form as may be required by the Director-General of Agriculture and Fisheries adequate records of—

- (a) The number and weight of fish received each day at the premises where he carries on the business of processing the fish:
  - (b) The person from whom the fish were received:
  - (c) The number of containers, and the weight and number of fish packed at the premises each day.
- (2) Every person carrying on business as aforesaid shall at any time during his ordinary hours of business, on being requested to do so by any officer, produce for inspection by the officer all or any of the records required to be maintained under subclause (1) of this regulation.
- (3) Every entry in the records required to be maintained under this regulation shall be identified by—
- (a) The serial number of each container in which the fish are packed:
  - (b) The number and weight of the fish packed in the container:
  - (c) The date of packing (which date may be in a code known to the Director-General of Agriculture and Fisheries).
- (4) Every person carrying on the business of processing or dealing in fish from any fish farm shall ensure that every container of the fish bears a label or marking clearly showing the number and weight of freshwater fish packed in the container and a batch number. Any such batch number may be in a code known to the Director-General of Agriculture and Fisheries.

**25. No fishing on fish farms**—No person shall fish on any fish farm: Provided that nothing in this regulation shall prohibit the normal working of any fish farm by the licensee or his employees or the taking of fish by any authorised officer pursuant to any provision of these regulations.

### PART III

#### DISEASE CONTROL

**26. Licensee to give notice of disease**—(1) If the licensee of any fish farm knows or suspects that any fish kept on the fish farm is or may be affected by any disease specified in the First Schedule to these regulations, or knows or suspects that any fish kept on the fish farm is or may be affected by any disease or condition he cannot identify, he shall, within 24 hours after the time when he discovers or first suspects the fish to be diseased, advise the Director-General of Agriculture and Fisheries, or the authorised officer specified in the licence for that purpose by the Director-General of Agriculture and Fisheries, and shall keep the fish diseased or suspected to be diseased from coming into contact with other fish.

(2) If the licensee of any fish farm knows or suspects that any fish kept on the fish farm is or may be affected by any disease specified in the Second Schedule to these regulations, and the fish do not respond to treatment within 14 days after the time when he discovers or first suspects the fish to be diseased, he shall, within 48 hours after the expiration of that period of 14 days, advise the Director-General of Agriculture and Fisheries or the authorised officer specified in the licence for that purpose by the Director-General of Agriculture and Fisheries, and shall keep the fish from coming into contact with other fish.

(3) In any case to which subclause (1) or subclause (2) of this regulation applies, no person shall allow any water in any pond containing any such diseased fish, except when the disease is known to be *Saprolegnia*, to be discharged into any natural waters from the time the disease is first discovered until the entire outflow of all the ponds containing the diseased fish has been passed through a properly operating treatment facility and has been treated to the satisfaction of an authorised officer.

**27. Preventive or remedial action—**(1) Any authorised officer may from time to time, by notice in writing to the licensee of a fish farm,—

(a) Require the licensee to carry out such action for the prevention of disease among the fish on the fish farm as is specified in the notice:

(b) Where the officer believes on reasonable grounds that any fish on the fish farm is diseased, require the licensee to carry out such action for the treatment of the disease and the decontamination of any ponds and intake and outlet structures as is specified in the notice.

(2) Where an authorised officer believes on reasonable grounds that—

(a) The fish is affected by any disease specified in the First Schedule to these regulations; or

(b) The fish is affected by any disease specified in the Second Schedule to these regulations which cannot be treated effectively on the fish farm; or

(c) The fish is affected by any other disease of such a nature as to require his urgent action,—

he may destroy any fish stocks affected, and may take such steps as he considers necessary to decontaminate any ponds and intake and outlet structures, or may, by notice in writing to the licensee, require him to destroy those fish stocks and take such steps as are specified in the notice to decontaminate those ponds and structures.

(3) The licensee shall comply with every notice given to him under the foregoing provisions of this regulation.

**28. Destruction of brood fish when genetic defects develop—**If an authorised officer believes on reasonable grounds that any genetic defects have developed in any fish kept on a licensed fish farm, he may, with the concurrence in writing of the Director-General of Agriculture and Fisheries, destroy any brood fish on the farm from which those fish have been derived or with the like concurrence, by notice in writing to the licensee, require him to destroy the brood fish, and the licensee shall comply with the provisions of the notice.

**29. No compensation for fish destroyed—**No compensation shall be payable in respect of any fish destroyed by an authorised officer pursuant to subclause (2) of regulation 27 or regulation 28 of these regulations or pursuant to a notice given by an authorised officer under the said subclause (2) of regulation 27 or the said regulation 28.

**30. Expenses incurred in destroying diseased fish and decontaminating ponds, etc.**—Any expense incurred by an authorised officer in treating or destroying any diseased fish on a fish farm or in decontaminating any ponds or structures on any fish farm, whether under any provision of this part of these regulations, may be recovered from the licensee as a debt due to the Crown in any Court of competent jurisdiction.

**31. Diseased fish not to be transferred**—No person shall—

- (a) Transfer any diseased fish from any fish farm to any other fish farm; or
- (b) Release into any waters any diseased fish kept on any fish farm.

**32. Officers may take specimens for examination**—Any authorised officer may at all reasonable times enter upon any licensed fish farm and any premises used for processing or dealing in fish from fish farms and, without payment of compensation, take for the purposes of examination a reasonable number of specimens of the fish and take samples of any food, water, soil, implements, or other relevant material kept thereon.

## PART IV

### MISCELLANEOUS PROVISIONS

**33. Inspection of fish farms**—Any officer may at all reasonable times enter any fish farm or premises used for processing or dealing in fish from a fish farm and inspect any fish, fish pond, animal material, equipment, structures, and facilities thereon or belonging thereto and all records required to be kept pursuant to these regulations.

**34. Notices**—(1) Any notice or other document to be given to or served on any licensee for the purposes of these regulations may be given or served by causing it to be delivered to the licensee, or to be left at his usual or last-known place of abode or business or at the address stated in any application or other document under these regulations, or to be sent to him by registered post addressed to him at that place of abode or business or address.

(2) If there is at any time more than one licensee of any fish farm, processing plant, or other premises, a notice given to or served on any licensee shall be deemed to have been given to or served on each and every licensee.

(3) Any notice sent by registered letter shall be deemed to have been received at the time when it would be delivered at its destination in the ordinary course of registered post.

(4) If at any time a licensee changes his address to an address that is different from that given in his application for a licence or for the renewal of a licence, he shall forthwith notify the Director-General of Agriculture and Fisheries in writing of the change.

**35. Obstructing officer**—Every person commits an offence against these regulations who obstructs, hinders, threatens, or assaults any officer in the exercise of his powers under these regulations.

**36. Offences**—(1) Every person commits an offence against these regulations who, without lawful excuse, proof of which excuse shall lie on him, acts in contravention of or fails to comply with any provision of these regulations or who fails to comply with any condition of a licence issued under these regulations.

(2) Every person who commits an offence against these regulations is liable on summary conviction to a fine not exceeding \$2,000, together with a further fine not exceeding \$5 in respect of each fish in respect of which the offence was committed, and, if the offence is a continuing offence, a further fine not exceeding \$20 for each day or part of a day during which the offence has continued.

**37. Cancellation of licence on conviction**—(1) Where any licensee is convicted of an offence against regulation 17, regulation 19, regulation 26, regulation 27, regulation 28, or regulation 31 of these regulations, or of an offence by way of failing to comply with any condition of a licence imposed pursuant to regulation 8 of these regulations, his licence shall be deemed to be cancelled and shall thereupon be void and of no effect.

(2) In proceedings against any licensee for any offence referred to in subclause (1) of this regulation, it shall be a defence if the licensee proves that the act or omission constituting the offence was committed by an employee of the licensee without the consent of the licensee and in breach of written instructions given to the employee of the licensee.

(3) Where any licensee is convicted of an offence against these regulations (not being an offence specified in subclause (1) of this regulation), the Court in its discretion, in addition to or instead of imposing any fine in respect of the offence, may cancel the licence, and thereupon the licence shall be void and of no effect.

(4) Where any licence is cancelled or deemed to be cancelled under this regulation, the licensee shall not be entitled to apply for a renewal thereof, without prejudice to his right to apply for a new licence under regulation 6 of these regulations.

---

## SCHEDULES

Reg. 2 (1), 26, 27 (2)

### FIRST SCHEDULE

The viral diseases—

- Lymphocystis.
- Infectious hematopoietic necrosis (IHN).
- Infectious pancreatic necrosis (IPN).
- Papillomatosis (cauliflower disease).
- Viral hemorrhagic septicaemia (VHS).

The bacterial diseases—

- Bacterial gill disease.
- Bacterial hemorrhagic septicaemia.
- Columnaris.
- Eel pest.
- Furunculosis.

FIRST SCHEDULE—*continued*

- Kidney disease.
- Peduncle disease.
- Piscine tuberculosis.
- Ulcer disease.
- Vibrio disease.
- The flagellate parasites—
  - Cryptobia.*
  - Hexamita.*
  - Octomitus.*
  - Oodinium.*
- The sporozoan parasites—
  - Myxosoma cerebalis.*

- Fin rot.
- Ichthyophthirius.*
- Leeches.
- Lernaea.*
- Saprolegnia.*
- Trichodina.*

P. J. BROOKS,  
Clerk of the Executive Council.

## EXPLANATORY NOTE

*This note is not part of the regulations, but is intended to indicate their general effect.*

These regulations make provision for the commercial farming of trout, salmon, eels, and freshwater crayfish. No freshwater fish farming or processing the produce of a freshwater fish farm is permitted in the Taupo Trout Fishing District or the County of Rotorua.

The regulations make provision for the licensing of fish farms by the Minister of Agriculture and Fisheries, the matters to be complied with by licensees, and the control of diseases among fish in fish farms. Licences are required to process or deal in the produce of fish farms.

---

Issued under the authority of the Regulations Act 1936.

Date of notification in *Gazette*: 26 October 1972.

These regulations are administered in the Ministry of Agriculture and Fisheries.
