EXPLANATORY NOTE

[This note is not part of the notice, but is intended to indicate its general effect.]

Except as varied by Modification Notices of local application, the Freshwater Fisheries Regulations 1951 provide, *inter alia*, that—

- (a) The *limit bag*, which is the maximum number of acclimatized fish to be taken by one person in one day computed from midnight to midnight, shall be twenty:
- (b) The *size limit*, which is the minimum size of fish lawfully takeable, measured from tip of nose to tip of tail, shall be 9 in. for trout and salmon. Under-sized fish must be released unharmed and are not reckoned in the limit bag:
- (c) Only artificial or natural fly, insect, worm, crustacea, or fish are lawful lures or baits for acclimatized fish. Shell fish (mollusca) and fish roe are illegal. Not more than two lures or baits may be used. Artificial flies, which include feathered lures, must have only one hook. In waters restricted to fly no weight or loaded lure is permitted. Any weight must be affixed above any lure or bait and, with artificial minnow (which includes spoon), at least 15 in. above.

This notice modifies the general regulations in the Wellington Acclimatization District by providing that the bag limit of twenty fish is not to include more than twelve trout, increasing the size limit in respect of perch taken in certain waters, and restricting the lures and methods that may be used in certain waters.

Restrictions on lures and methods are relaxed in the case of children under sixteen.

Issued under the authority of the Regulations Act 1936.

Date of notification in *Gazette*: 6 October 1955.

These regulations are administered in the Marine Department.
