# New First, Second, and Third Schedules substituted in Trade in Endangered Species Act 1989

## First Schedule

s 3(1)

### Species endangered by trade

The families and species listed in this schedule are arranged, not in alphabetical order, but in descending order in which they developed. This order of arrangement is adopted in the Convention on International Trade in Endangered Species of Wild Fauna and Flora, and is the order of arrangement generally adopted by zoologists.

The entries in the column headed “Exceptions/limitations” have the effect of either—

- (i) excluding nominated populations of the listed species; or
- (ii) limiting the application of the listed species to only those populations nominated; or
- (iii) excluding certain species from a generic listing; or
- (iv) excluding nominated varieties of specimens of the listed species.

## Second Schedule

### Species threatened by trade

The families and species listed in this schedule are arranged, not in alphabetical order, but in descending order in which they developed. This order of arrangement is adopted in the Convention on International Trade in Endangered Species of Wild Fauna and Flora, and is the order of arrangement generally adopted by zoologists.

The entries in the column headed “Exceptions/limitations” have the effect of either—

- (i) excluding nominated populations of the listed species; or
- (ii) limiting the application of the listed species to only those populations nominated; or
- (iii) excluding certain species from a generic listing; or
- (iv) excluding nominated varieties of specimens of the listed species; or
- (v) limiting the application of the listed species to only those categories of specimens nominated.

## Third Schedule

### Species exploited by trade

s 3(1)

The families and species listed in this schedule are arranged, not in alphabetical order, but in descending order in which they developed. This order of arrangement is adopted in the Convention on International Trade in Endangered Species of Wild Fauna and Flora, and is the order of arrangement generally adopted by zoologists.

The countries listed in the column headed “Countries requiring export permit” are parties to the Convention on International Trade in Endangered Species of Wild Fauna and Flora that require an export permit to authorise trade in the species listed in the schedule. Trade in the species in relation to other countries that are parties to the Convention requires a certificate of origin.
