**For South Island freshwater eels, the species code letters are the same as the letters of the fishstock codes that are recorded on freshwater eel catch landing returns. On monthly harvest returns, however, the code ANG must be used in conjunction with the appropriate quota management area.

Clerk of the Executive Council.

Explanatory note

This note is not part of the regulations, but is intended to indicate their general effect.

These regulations, which come into force on the 28th day after the date of their notification in the *Gazette*, amend the Fisheries (Reporting) Regulations 2001. The amendments—

- • add fish with a destination code D to the fish with certain destination codes for which a monthly harvest return is not required:
- • insert new fishstock codes for species introduced into the quota management system: leatherjacket, long-finned freshwater eel, rough skate, sea urchin, kina, sea egg, smooth skate, and short-finned freshwater eel:
- • insert a new table of species code that includes new species and corrects errors in the name of species:
- • in relation to landed state codes, omit GGU (gilled and gutted) and substitute GGO (gilled and gutted tail on) and GGT (gilled and gutted tail off).

Issued under the authority of the Legislation Act 2012.
Date of notification in *Gazette*: 4 September 2003.
