Pesticides (Fees) Regulations 1997

(SR 1997/368)

Pesticides (Fees) Regulations 1997: revoked, on 17 October 2007, by section 56(f) of the Agricultural Compounds and Veterinary Medicines Amendment Act 2007 (2007 No 93).

PURSUANT to section 76 of the Pesticides Act 1979, His Excellency the Governor-General, acting by and with the advice and consent of the Executive Council, makes the following regulations.

Contents

	Page
1 Title and commencement	1
2 Fees	2
3 Revocations	2
Schedule	2

Fees payable under Pesticides Act 1979

1 Title and commencement

- (1) These regulations may be cited as the Pesticides (Fees) Regulations 1997.

Note

Changes authorised by section 17C of the Acts and Regulations Publication Act 1989 have been made in this eprint.

A general outline of these changes is set out in the notes at the end of this eprint, together with other explanatory material about this eprint.

These regulations are administered in the Ministry of Agriculture.

- (2) These regulations come into force on 15 January 1998.

2 Fees

- (1) The fees set out in the Schedule are payable in respect of the matters to which they relate.
- (2) The fees prescribed by these regulations are inclusive of goods and services tax.

3 Revocations

The Pesticides (Fees) Regulations 1993¹ and the Pesticides (Fees) Regulations 1993, Amendment No 1² are consequentially revoked.

Schedule Fees payable under Pesticides Act 1979

Reg 2

\$

1. On application under section 21 for authority to import pesticides for use by their proprietors, for each importation of each pesticide—	
(a) Where the application is made by a single proprietor	55.00
(b) Where the application is made by 2 or more proprietors (payable in such proportions as the proprietors decide)	66.00
2. On application under section 22 for registration of a pesticide (other than an application in respect of a pesticide for which an experimental use permit referred to in clause 5(b) is in force)—	

¹ SR 1993/172

² SR 1995/102

	\$
Pre-screening cost	364.50
Plus administration cost	1,685.81
Plus manufacturing assessment.....	136.69
Plus toxicology evaluation—	
(a) For an application for a pesticide with an active ingredient that is new to pesticides or to pesticides of that type	3,280.50
(b) For an application for a pesticide with no active ingredient that is new to pesticides or to pesticides of that type, but which requires more than the basic evaluation referred to in paragraph (c)	911.25
(c) For an application which involves only minimal public or environmental exposure, which requires no assessment of data, and which requires only a basic toxicology evaluation	546.75
Plus, in the case of pesticides that are to be used in respect of a food crop and that require a residues/metabolism evaluation,—	
(a) For the first named food crop to which the pesticide is to be applicable.....	956.81
(b) For each additional named food crop to which the pesticide is to be applicable	455.63
Plus environmental fate and toxicity assessment—	
(a) For an application for a pesticide with an active ingredient that is new to pesticides or to pesticides of that type	1,959.19

	\$
(b) For an application for a pesticide with no active ingredient that is new to pesticides or to pesticides of that type, but which requires more than the basic assessment referred to in paragraph (c).....	911.25
(c) For an application which involves only minimal public or environmental exposure, which requires no assessment of data, and which requires only a basic environmental fate and toxicity assessment.....	546.75
Plus efficacy/phytotoxicity review—	
(a) For the first named pest and crop to which the pesticide is to be applicable....	1,184.63
(b) For each additional named pest or crop, to which the pesticide is to be applicable	546.75
3. On application under section 22 for registration of a pesticide in respect of which an experimental use permit referred to in clause 5(b) is in force—	
Pre-screening cost	364.50
Plus, in respect of each of the following modules that would be required if the application had been made under clause 2, and that have not been successfully completed and passed during the processing of the application for the experimental use permit: manufacturing assessment, toxicology evaluation, residues/metabolism evaluation, environmental fate and toxicology evaluation.....	The fee, or part of the fee, that would have been payable if the application had been made under clause 2

\$	
city assessment, and efficacy/phytotoxicity review.....	
4. On application to vary any registration or experimental use permit, or to revoke or vary any term, condition, or requirement imposed by the Board,—	
(a) For minor changes (including change of proprietor’s name and address, change of trade name, transfer of registration or experimental use permit, and administrative change to a label)	364.50
(b) For substantive changes (including change in sourcing of active ingredients, change of manufacturer or method of manufacture, and change in the shelf-life)	The fee, or part of the fee, that would have been payable if the application had been made under clause 2
On application under section 25 for an experimental use permit—	
(a) Where the product is not for sale.....	364.50
(b) In the case of any other application...	The fee, or part of the fee, that would have been payable if the application had been made under clause 2
6. Annual registration fee payable in respect of any pesticide, payable on 1 July in each year	562.50

§

<p>7. On application for transfer of rights of proprietor under section 32(2) or for reinstatement of any registration that has been cancelled or revoked at the request of the proprietor or revoked for failure to pay the annual fee,—</p> <p>(a) In the case of an application made within 24 months of the cancellation or revocation of the registration</p> <p>(b) In the case of any other application...</p>	<p>A fee equivalent to the annual fees that would have been payable under clause 6 between the date of cancellation or revocation and the date of application, if the registration had not been cancelled or revoked</p> <p>The fee, or part of the fee, that would have been payable if the application had been made under clause 2</p>
---	---

MARIE SHROFF,
Clerk of the Executive Council.

Explanatory note

This note is not part of the regulations, but is intended to indicate their general effect.

These regulations, which come into force on 15 January 1998, prescribe the fees payable in respect of matters under the Pesticides Act 1979.

The regulations provide, among other things, for—

- (a) Fees payable in respect of an application for registration of a pesticide:

- (b) Fees payable in respect of amendments to the register:
- (c) Fees payable in respect of an application for an experimental use permit:
- (d) Fees payable in respect of reinstatement of registration:
- (e) The annual fee for a registered pesticide, payable on 1 July in each year. The Board has power to revoke the registration of a pesticide if the annual fee remains unpaid for more than 6 months (s 27A(2)).

The regulations replace the Pesticides (Fees) Regulations 1993(as amended in 1995).

The regulations introduce differential fees for applications for registration of a pesticide. The current fee for these applications is a flat fee of \$3,150. The new fee is broken down to reflect the number of stages through which an application may need to be processed. These consist of a pre-screening stage, followed by the full processing of the application. The various stages are as follows:

Pre-screening Module

This consists of the administrative pre-screen, followed by the technical pre-screen. All applications received will be progressed through these 2 sub-modules. If there is a deficiency in the application, at the conclusion of this pre-screening section the application will be referred to the Board or its sub-delegated decision-making authority with a recommendation that the application be declined. The total amount payable at this point is \$364.50.

Administrative Cost

All applications that are not declined at the end of the pre-screening module will attract a charge of \$1,685.81 to cover all administration in respect of the processing of the application. This charge will make up part of the final application fee.

Manufacturing Assessment

Every application will be evaluated under this module. The cost to the applicant per application is \$136.69 for costs incurred in respect of an assessment of the chemical identity, properties, formulation details and manufacturing processes, including specifications and analytical methods for all formulation ingredients, and impurities in the final product. An assessment of the stability of the final manufactured product may be included.

Toxicology Module

Every application will be processed and evaluated in respect of toxicology. There are 3 different toxicology sub-modules. Every product which has a new active ingredient will be required to undergo an assessment of the full range of acute studies, short-term repeat dose studies, sub-chronic toxicity studies, long-term toxicity studies, reproduction studies, developmental studies, genotoxicity studies, metabolism and toxicokinetic studies, human toxicological data, special toxicity data (eg neurotoxicity), first aid and safety directions assessment and any other additional data which may be required to make a full assessment of the hazard or risk of the active ingredient and the product. The fee for the module is \$3,280.50.

An alternative module will be applied where the active ingredient is known. The fee for this module is \$911.25. Another alternative is the basic toxicological assessment module. The cost of the module will be \$546.75.

Residues/Metabolism Module

Every product that is going to be used in respect of a food crop will be subject to an assessment in this module. The assessment will cover the data showing the nature and level of residues and significant metabolites resulting from the proposed use-pattern in the target crop, and the establishment of withholding periods. It reviews the analytical methods used to determine the residues. It also includes an assessment of the effect of any major variables needed to determine the need for, and if necessary, the establishment of residue limits. For the first food crop the product is claimed to treat pests, the cost under this module is \$956.81. For every other food crop the product is claimed to treat pests, the cost will be an additional \$455.63.

Environmental Fate and Toxicity Assessment

Every application will be required to be assessed in this area. There are 3 levels of assessment. Where the active ingredient is new, the assessment will be thorough and involves an assessment on environmental chemistry, fate, and toxicology. This will include full studies on degradation, mobility, accumulation and metabolism in the environment. The studies will include toxicity studied in birds, mammals, and other vertebrates, aquatic organisms, non-target invertebrates, and non-target plants. The cost of the assessment will be \$1,959.19.

Where the active ingredient is a known active ingredient, the assessment will not be as thorough and will rely to some extent on established data. The cost of this will be \$911.25.

A basic assessment will be made in other circumstances. The cost where a basic assessment is all that is required will be \$546.75.

Efficacy/Phytotoxicity Module

This module covers a review of the data provided in respect of efficacy against the pest and phytotoxicity in the host species. This will involve field trials and any other trials or studies to justify claims made in respect of the target pest. The cost under this module will be \$1,184.63 for the first claim in respect of the target pest and \$546.75 for each additional claim.

Issued under the authority of the Acts and Regulations Publication Act 1989.
Date of notification in *Gazette*: 18 December 1997.

Notes**1 General**

This is an eprint of the Pesticides (Fees) Regulations 1997. It incorporates all the amendments to the Pesticides (Fees) Regulations 1997 as at 17 October 2007. The list of amendments at the end of these notes specifies all the amendments incorporated into this eprint since 3 September 2007. Relevant provisions of any amending enactments that contain transitional, savings, or application provisions are also included, after the Principal enactment, in chronological order.

2 About this eprint

This eprint has not been officialised. For more information about officialisation, please see "Making online legislation official" under "Status of legislation on this site" in the About section of this website.
