### Schedule 3

#### Species exploited by trade

s 3(1)

The classes, families, and species listed in this schedule are arranged in descending order by class then in alphabetical order by order, family, and species. This order of arrangement is adopted in the Convention.

The countries listed in the column headed “Exceptions/limitations and Countries requiring export permit” are parties to the Convention on International Trade in Endangered Species of Wild Fauna and Flora that require an export permit to authorise trade in the species listed in this schedule. Trade in those species in relation to other countries that are party to the Convention requires a certificate of origin.

### **Explanatory note**

*This note is not part of the order, but is intended to indicate its general effect.*

This order comes into force on 14 September 2014. It substitutes new schedules in the Trade in Endangered Species Act 1989. The new schedules update the lists of endangered, threatened, and exploited species to align them with the changes that have been made to the Convention on International Trade in Endangered Species of Wild Fauna and Flora. Terminology in the schedules is amended to reflect more accurately that used in the Convention, and a new layout is used in the schedules so that fauna and flora are treated the same and so that classes of fauna are easier to identify.

Issued under the authority of the Legislation Act 2012.
