

which supply is being given, and that the connection or continuance of supply would not cause a leakage from those wires and fittings exceeding one ten-thousandth part of the maximum supply of current to the premises; and where the said licensee declines to make such connection or to continue to supply it shall serve upon the consumer a notice stating the reasons of so declining.

25. If the said licensee is reasonably satisfied, after making all proper examinations by testing or otherwise, that the wiring and fittings are not suitable for the voltage being employed, that a leakage exists at some part of the circuit of such extent as to be a source of danger, and that such leakage does not exist at any part of the circuit belonging to the said licensee, or that any other requirements of this license, so far as they apply to the consumer's premises, are not being complied with, then and in such case any officer of the said licensee duly authorized in writing may, for the purpose of discovering whether the leakage exists at any part of the circuit within or upon any consumer's premises, or whether the wiring is suitable, and the general requirements of this license are complied with, by notice require the consumer at some reasonable time after the service of the notice to permit inspection of the wires and fittings belonging to the consumer and forming part of the circuit.

26. If on such testing and inspection the officer discovers a leakage from the consumer's wires exceeding one ten-thousandth part of the maximum supply current to the premises, or that the requirements of this license are not properly conformed to, or if the consumer does not give all due facilities for inspection and testing, the said licensee shall forthwith discontinue the supply of energy to the premises in question, giving immediate notice of the discontinuance to the consumer, and shall not recommence the supply until it is reasonably satisfied that the cause of leakage has been remedied, and that the installation is in conformity with these conditions.

27. If any consumer is dissatisfied with the action of the said licensee in refusing to give, or in discontinuing, or in not recommencing the supply of energy to his premises, the wires and fittings of that consumer may, on his application to the Minister and on payment of the cost of such inspection, be inspected and be tested for the existence of leakage by the Inspecting Engineer.

This provision shall be endorsed on every notice given under the provisions of either of the two last preceding clauses hereof.

28. From the time when the said licensee commences to supply energy through any distributing-main, and during the continuance of this license, it shall maintain continuously sufficient power for the use of all the consumers for the time being entitled to be supplied from such main; provided that for any purposes connected with the efficient working of the undertaking the Minister may give permission to the said licensee to discontinue the supply at such intervals and at such periods as he thinks expedient. When the supply is so discontinued, public notice shall be given when practicable of such discontinuance and of the probable duration thereof.

29. The variation of pressure at any consumer's terminals shall not under any conditions exceed 4 per cent. above or below the normal pressure at which he is being supplied.

30. The said licensee shall not use the said electric lines, or permit the same to be used, for any purpose until the Minister has given notice in writing to the said licensee that he has received from the Inspecting Engineer a certificate that the work hereby authorized has been satisfactorily carried out.

31. The Minister may at any time order an inspection to be made of the lines and wires of the said licensee. If any defect is found to exist it must be remedied forthwith, and if serious in the opinion of the Inspecting Engineer the Minister may, on the receipt of the report, direct the said licensee to at once cease transmitting energy either over the whole of the said electric lines and wires, or any part thereof, as to him may seem fit, until such defect is repaired or remedied. The cost of such inspections shall be borne by the said licensee.

32. After the supply of energy has begun, not less than fourteen days' notice in writing shall be given to the Resident Engineer of Public Works at Gisborne, and to the Telegraph Engineer for the district, his deputy, or such other officer as the Minister from time to time directs, of each alteration or further extension that the said licensee is about to make.

33. The said licensee shall, upon the receipt of an application from an occupier of any premises, within 60 ft. of any of the said licensee's public-supply lines, furnish such premises with electric energy upon the same terms and conditions on which any other consumer is entitled under similar circumstances to a corresponding supply.

34. The said licensee shall, before erection or construction of any part of the work hereby authorized is begun, submit

for the approval of the Minister such plans and other information showing and describing such work as he may require.

35. The construction of the works hereby authorized shall be substantially commenced on or before the 1st day of November, 1914, and shall be completed on or before the 1st day of February, 1915.

36. The said licensee shall, prior to the completion of the said works, give to the Minister at least one month's notice in writing of the estimated date of such completion.

37. This license, and the benefits and obligations hereunder, shall not be assigned by the said licensee without the express consent in writing of the Minister first had and obtained; but such consent shall not be withheld if it is proved to the satisfaction of the Minister that the transferee is financially and otherwise able to carry out the obligations specified in this license.

38. If the said licensee fails to comply with any of the conditions of this license, the Minister may, by notice in writing, require the licensee within thirty days to remedy the default specified in that notice, and if the said licensee fails to comply with the terms of the notice within the said period, he shall be liable to a penalty of £10, to be recoverable by or on behalf of the Minister as a debt due to the Crown.

39. Notwithstanding anything in the last preceding clause of these conditions, if the said licensee fails to comply with the terms of any such notice for ninety days after the receipt thereof, the Governor in Council may thereupon revoke this license without further notice.

40. For the purpose of ascertaining whether the conditions of this license are being faithfully complied with by the said licensee, the Minister, or any person appointed by him in that behalf, may at all reasonable times enter on the lands and works and inspect the same.

41. Nothing in this license shall be deemed in any way to interfere with, affect, or abridge any rights or powers vested in His Majesty the King, or in the Governor on his behalf, authorizing the construction, management, or working of any public works, nor shall any compensation be payable to or on behalf of the said licensee for injury done to the works herein authorized by the construction, management, or working of any such public work as aforesaid, or for the loss occasioned thereby, or for the exercise of any such right or power as aforesaid.

42. Notwithstanding anything hereinbefore contained, the said licensee shall not be entitled to erect, maintain, or use the said electric lines except subject to such conditions, not inconsistent with the provisions of this license, as may from time to time be agreed on between the said licensee and the Waiapu County Council.

43. This license shall come into force on and after the date of publication thereof in the *New Zealand Gazette*.

J. F. ANDREWS,  
Clerk of the Executive Council.

*Regulations for Trout-fishing, Rotorua Acclimatization District.*

LIVERPOOL, Governor.

ORDER IN COUNCIL.

At the Government House at Wellington, this twenty-seventh day of October, 1914.

Present:

HIS EXCELLENCY THE GOVERNOR IN COUNCIL.

IN pursuance of the powers and authorities vested in him by the Fisheries Act, 1908, and its amendments, His Excellency the Governor of the Dominion of New Zealand, acting by and with the advice and consent of the Executive Council of the said Dominion, doth hereby make the following regulations for the Rotorua Acclimatization District and the waters thereof; and doth hereby declare that these regulations shall, as from the first day of November, one thousand nine hundred and fourteen, supersede all regulations at variance therewith, and such regulations are hereby revoked.

REGULATIONS.

1. LICENSES to fish for trout in all waters within that district or part of the North Island known as the Rotorua Acclimatization District, described in the First Schedule hereto, and comprising the Counties of Rotorua, Whakatane, and East Taupo, and parts of the Counties of Wairoa, West Taupo, and Matamata, may be issued under the hand of the General Manager of the Department of Tourist and Health Resorts, or any one authorized in writing by the said General
