GENERAL DESCRIPTION.

The Lake Settlement is situated fourteen miles from Glenhope Railway-station, sixty-five miles from Nelson, by good dray-road and cart-bridge across Buller River.

The settlement lies at an altitude of from 1,400 ft. to 3,300 ft. above sea-level, and consists of agricultural and pastoral land. The former is suitable for oat and turnip crops, and the latter is good sheep-country.

The climate is fairly wet, but not too much rain to suit the nature of the soil. It is fairly cold in winter, with occasional falls of snow, which does not remain more than a day or two on the ground. Very little cultivation has been carried on. The land at present is principally covered with grasses, tussock, and bush.

Speaking generally, it is ideal sheep and cattle country, as it grows abundance of grass from November to April; and winter feed can be grown to supply the requirements during the remainder of the year.

Full particulars may be ascertained and plans obtained at this office.
