WELLINGTON, THURSDAY, FEBRUARY 18, 1915.

Additional Regulations under the War Regulations Act, 1914.

LIVERPOOL, Governor.
ORDER IN COUNCIL.

At the Government Buildings at Wellington, this sixteenth day of February, 1915.

Present:

THE RIGHT HONOURABLE W. F. MASSEY, P.C., PRESIDING IN COUNCIL.

IN pursuance and exercise of the powers and authorities conferred on him by the War Regulations Act, 1914, and of every other power and authority enabling him in this behalf, His Excellency the Governor of the Dominion of New Zealand, acting by and with the advice and consent of the Executive Council of the said Dominion, doth hereby make the following additional regulations under that Act, and doth hereby declare that the said regulations shall come into operation on the eighteenth day of February, one thousand nine hundred and fifteen.

REGULATIONS.

1. No person shall sell any intoxicating liquor to any member of the Defence Forces, or to any member of the Expeditionary Forces, when in uniform, for consumption elsewhere than on the premises where it is sold.
2. No person shall give or supply or act as agent for the purchase of any intoxicating liquor for any member of the Defence Forces, when in uniform, for consumption elsewhere than on the premises where it is given, supplied, or purchased.

J. F. ANDREWS,
Clerk of the Executive Council.

The first part of the paper discusses the importance of the patient's history and physical examination in the diagnosis of acute abdomen. The author emphasizes that a thorough history and physical examination are essential for identifying the underlying cause of the patient's symptoms. The second part of the paper describes the various diagnostic tests that are available to the surgeon, including laboratory tests, imaging studies, and surgical exploration. The author discusses the strengths and weaknesses of each of these tests and provides guidance on when to use each one. The third part of the paper discusses the various surgical approaches that are available for the treatment of acute abdomen. The author discusses the indications for each approach and provides guidance on how to choose the best approach for each patient. The fourth part of the paper discusses the various complications that can occur after surgery for acute abdomen. The author discusses the causes of these complications and provides guidance on how to prevent them. The fifth part of the paper discusses the various factors that can affect the patient's recovery after surgery for acute abdomen. The author discusses the importance of patient education and support and provides guidance on how to help the patient recover as quickly and comfortably as possible.

The author concludes that the diagnosis and treatment of acute abdomen is a complex task that requires a thorough understanding of the patient's history and physical examination, as well as a knowledge of the various diagnostic tests and surgical approaches that are available. The author emphasizes that the surgeon's role is to identify the underlying cause of the patient's symptoms and to provide the best possible treatment for each patient. The author also emphasizes the importance of patient education and support in the recovery process.

The author also discusses the importance of the patient's history and physical examination in the diagnosis of acute abdomen.
