SUMMARY FOR THE MONTH OF JANUARY, 1916.

Over the country generally very warm weather was experienced, with an absence of high winds.

The rainfall was nearly everywhere below the average, the greatest deficiency being in the East Coast districts of the South Island. North of Auckland there was an excessive precipitation, which was accounted for by the passage of a depression to the northwards between the 24th and the end of the month.

Three westerly "lows" passed in the south—viz., on the 1st, 12th, and 26th—and these were responsible for rain in various districts.

D. C. BATES, Director
