## SUMMARY FOR THE MONTH OF FEBRUARY, 1921.

During February the weather was generally warm and very dry. The middle of the month was bright and sunny, except in the far North, where some heavy rains were reported from the 12th to the 14th. From the 7th to the 9th considerable rain fell in the North and in some parts of the north-western coast of the South Island. At Hokitika, on the morning of the 7th, 3-12 inches of rain fell between 1.30 a.m. and 7.30 a.m.

A strong south-westerly sprang up on the 22nd and brought rain to many parts of the country, especially to the East Coast districts; it was accompanied by a cold snap, and the hills were lightly covered with snow on both Islands at this time.

The rainfalls in Poverty Bay were greater than in Hawke's Bay, and drought conditions set in in the latter district. Most parts of Marlborough also suffered from drought during February.

D. C. BATES, Director.
