I therefore declare the said John Robert Thacker, John Ronald Hamilton, and John Fisher, who have received the greatest number of votes, to be elected.

Dated at Wellington, this 20th day of December, 1923.

G. G. HODGKINS, Returning Officer.

The first part of the document discusses the general principles of the system. It is divided into several sections, each dealing with a different aspect of the overall framework. The text is dense and technical, covering various details of the system's architecture and operation.

The second part of the document provides a detailed description of the system's components. It includes a list of the various modules and their functions, as well as a discussion of how these components interact with each other. This section is crucial for understanding the system's internal structure.

The final part of the document discusses the implementation and testing of the system. It describes the various steps involved in setting up the system and the methods used to verify its performance. This section is essential for anyone looking to replicate the system or troubleshoot any issues that may arise.
