

- (h.) Adequate provision shall be made by means of sinks and like sanitary fittings for the cleansing of appliances used on the premises, and ablution-basins shall be provided for the use of persons employed in or about the premises. Hot and cold water shall be supplied for use in such sinks, fittings, and basins, and there shall be adequate provision for the sterilization of appliances used in breaking eggs or receiving egg-pulp.
- (i.) There shall be adequate provision of means for the accurate candling of eggs.
- (j.) Provision shall be made for the individual breaking of the eggs by hand.
- (k.) In every yard, pathway, and cartway used in connection with the premises such area as may be indicated by by-law, or, in the absence of such by-law, by an Inspector of Health, shall be provided with a covering of macadam, concrete, asphalt, or other hard, even surface, suitably graded and drained.
- (3.) No person shall dry or pulp eggs for sale for human consumption otherwise than in accordance with the following provisions :—
- (a.) The floor and walls of every room on the premises shall at all times be reasonably clean.
- (b.) Every receptacle and appliance used in drying or pulping eggs for sale shall be so constructed as to be easily cleansed, and shall be kept clean.
- (c.) Materials for use in the preparation of food shall be so stored and protected as to keep them free from any source of contamination or taint.
- (d.) Every person employed in handling, preparing, or packing food for sale, or in cleansing jars, vats, and like containers, shall at all times keep his person and clothing clean, and shall observe the provisions of clause 4 of these regulations.
- (e.) Every yard and passage-way on the premises shall be kept clean and free from accumulation of boxes, tins, and any material which may offer harbourage for rats or become offensive.
- (f.) Every appliance used in the drying, pulping, and mixing of eggs shall be effectively cleansed and sterilized after use, and troughs, tubs, and containers shall be rinsed with boiling water, and so covered or placed as to prevent dust or dirt accumulating therein while not in use. Appliances which have been contaminated by any tainted or decomposed egg shall be cleansed and immersed for not less than ten minutes in boiling water.
- (g.) Containers used for packing pulped eggs shall be cleansed and sterilized, and incapable of imparting odour to the contents.
- (h.) Cupboards, trays, and shelves in which food is stored shall be washed frequently so as to be clean and free from debris.
- (i.) Troughs, containers, or other vessels which are broken or cracked, or which have rough, rusted, or uneven surfaces or edges, shall not be used to hold food.
- (j.) Every person while engaged in breaking or otherwise preparing eggs for drying or pulping shall wear a clean white smock or overall (washable).
- (k.) No person shall smoke or chew tobacco while engaged in drying or pulping or preparing eggs for pulping, and no person shall smoke or spit or urinate in any room where such drying or pulping is being carried on.
- (l.) Sweepings and other refuse shall be removed daily from every drying or pulping plant or storeroom.
- (4.) The processes employed in pulping eggs or in drying eggs for sale shall be subject to the following provisions :—
- (a.) The eggs shall be individually examined by the candling process, and a further examination shall be made after breaking. Eggs of doubtful quality shall not be used for sale for human consumption.
- (b.) Eggs shall be deemed unfit for pulping if their contents show any change from the normal.
- (c.) All egg-pulp shall be dried or frozen as soon as possible after the eggs are broken.
- (d.) No preservative or other substance shall be added to any dried egg, egg-pulp, or other egg-mixture.

F. D. THOMSON,  
Clerk of the Executive Council.
