NOTE.—The weather during January was more appropriate to spring than to mid-summer. Strong north-west winds prevailed, and temperatures and rainfall were below the mean of previous years. Total bright sunshine, 237 hours, 52 per cent. of the possible, and one sunless day. Lightning was seen on the 1st, 3rd, and 5th, thunder was heard on the 3rd, and hail fell on the 1st. Mean dew-point at 9 hrs., 50.3°; and mean vapour pressure, 0.363 in.

SUMMARY FOR THE MONTH OF JANUARY, 1932.

General.—January proved to be a less pleasant month than the preceding two. It was remarkable for the persistence of strong westerly or north-westerly winds, the Auckland Province being the only portion of the country to escape them. Temperatures were low for January, December having been a warmer month at many places.

In the North Island the rainfall was much below the average. In the eastern districts of the South Island, too, there was a deficit which, though at most places not large, was especially detrimental owing to dry conditions having existed for many months previously. Frequent showers were experienced in Otago, except for the extreme northern portion, and the condition of crops and pastures has improved there very considerably.

On the whole of the west coast of the South Island the rains were heavy. Indeed, the complaint there is of too much rather than too little precipitation. In Nelson and Marlborough, also, there were good rains, and conditions appear to be quite satisfactory. Over most of the North Island, feed is becoming scarce and dairy yields are falling off. Stock, however, appear on the whole to be in good condition, except in Poverty Bay and parts of Hawke's Bay. Conditions in these latter districts are such as to cause graziers much anxiety and, unless good rains come soon, losses of sheep are likely to be heavy in winter. The situation is distinctly bad, also, in large parts of the plain country from the Hurunui to the Waitaki in the South Island. Nevertheless, many of the wheat-crops in Canterbury are heavy, and the quality is good.

Rainfall.—In the greater part of the North Island the rain amounted only to about half the average. Parts of the west coast, the Bay of Plenty, and also Whangarei experienced more normal conditions. In western districts of the South Island and most of Otago the experience was the reverse of that in the North Island, some places receiving almost double the average fall for January. From Hanmer Springs southward to Oamaru and its back country the total was less than the average, and much of the rain was too light to be of much benefit.

Temperatures.—Though eastern districts experienced many warm days while the north-west winds were blowing, changes were frequent and the nights were generally cool. The mean temperature was between 3° F. and 4° F. below the normal for January in places exposed directly to the westerly winds. East of the ranges the departures were much smaller. Frosts occurred in parts of the South Island on the 2nd, and some damage was done to tender crops. A second frost, on the 31st, was rather more severe, and extended to parts of the North Island.

Winds.—The prevalence of north-west or westerly winds has already been mentioned. In the Taranaki Bight and the Wellington Province generally those of the 3rd and the 26th were the most severe, some damage being done. The desiccating nature of the westerly winds accentuated the effects of the drought in the eastern districts.

On the 5th a small tornado struck Fitzroy, a suburb of New Plymouth, wrecking buildings, power-lines, &c.

Pressure Systems.—The weather generally was of the type characteristic of spring rather than summer. Westerly depressions moved from Australia with unusual speed and regularity. Most weeks saw the advent of two of them, the total for the month being 10. Several were deep to the southward, but their northward extensions were generally poorly developed. The second of the depressions was a complicated one, the weather remaining unsettled from the 2nd to the 5th. The greater part of the Dominion received moderate to heavy rain during this period.

On the 9th a cyclone developed on the east coast of Australia and passed to the southward of New Zealand next day. It brought heavy rains to Taranaki and the western half of the South Island.

This storm was followed during the 14th to 16th by one which, unlike the others experienced during the month, had a good northward extension. A centre developed in this northern portion and heavy rains were recorded over practically the whole of the North Island. In the north-central portion, especially, the falls were very heavy.

The last storm of moment passed on the 28th and 29th. Rain was again widespread. The heaviest falls were in western districts. Greymouth experienced a severe thunderstorm, 3.78 inches falling in the town. Some damage was done by floods and washouts.

The total estimated quantity of timber in cubic feet is 123,028, or in board feet 759,700, made up as follows:—

Species.	Cubic Feet.	Board Feet.
Rimu	18,662	118,800

	123,028	759,700

Upset price: £775.

Time for removal: One year.

Terms of Payment.

A marked cheque for one-fourth of the purchase-money, together with £1 ls. license fee, must accompany tender, and the balance be paid by three equal quarterly instalments, the first to be made three months after the date of sale.

Terms and Conditions.

1. All instalment-payments shall be secured by "on demand" promissory notes made and endorsed to the satisfaction of the Commissioner of State Forests, and interest at the rate of 1 per cent. per annum in excess of current bank overdraft rates will be charged on all notes overdue from the date of maturity to the date of payment.

2. The right to cut and remove the timber will be sold in accordance with the provisions of the Forests Act, 1921-22, the regulations in force thereunder, and these conditions.

3. The aforementioned qualities, quantities, and kinds as to the said timber shall be taken as sufficiently accurate for the purposes of this sale, and no contract for the purchase

shall be voidable, nor shall the successful purchaser be entitled to any abatement in price, by reason of the said timber being of less quantity, quality, or kind as stated herein or in any advertisement having reference to the said timber.

4. A return, verified by affidavit, giving the number of logs out of each species and their contents must be made quarterly by the licensee on the last days of March, June, September, and December, respectively, in each year. A return, similarly verified, must be made on the same dates showing the output of sawn timber of each species. These returns may be ascertained and verified by the inspection of the books of the mill, or by such other means as the Conservator may require, and for this purpose the accounts and books shall be open to the inspection of the Conservator, a Forest Ranger, or other duly authorized officer.

5. The attention of all tenderers is drawn to the fact that the local controlling body may require the successful tenderer to pay any claims or charges which may be made by that body for the maintenance of the road over which the timber may be transported, and before a sawmill license is issued a letter indicating that satisfactory arrangements have been made in this connection must be produced to the undersigned.

6. Intending tenderers are expected to visit the locality and to satisfy themselves in every particular on all matters relative to the sale.

7. Each tenderer must state the total price that he is prepared to pay for the timber. The highest or any tender will not necessarily be accepted, and the timber described is submitted for sale subject to the final acceptance of the tender by the Commissioner of State Forests.

8. The right is reserved to the Commissioner of State Forests to withdraw from sale any or all of the said timber either before or after the closing date for receipt of tenders.

9. If no tender is accepted for the timber herein mentioned it will remain open for application at the upset price until further notice.

10. Tenders should be on the special form obtainable from any office of the State Forest Service, and should be enclosed in envelopes addressed "Conservator of Forests, Hokitika," and endorsed "Tender for Timber."

The conditions, which will be inserted in the license to be issued to the purchaser, and further particulars may be obtained on application to the undersigned or to the Director of Forestry, Wellington.
