hereby makes and levies a special rate of [State amount in the pound] upon the rateable value of all rateable property of the [Name of district or sperial-rating area], comprising [Name the district-e.g., the whole of the County of
special-rating area, name the ward, riding, or other statutory subdivision comprising the same; or, if not such a subdivision, describe by its boundaries, and state the numbers of the sections and blocks comprising the same, and name of survey district. If the special-rating area has no specific name, refer to it as "special-rating area"]; and that such special rate shall be an annually recurring rate during the currency of such securities, and be payable an annually recurring rate during the currency of such securities, and be payable
half-yearly on the day of $\quad$ and the yearly on the day of $\quad 1$ in each and every year until the last maturity date of such securities, being the day of
are fully paid off. are fully paid off.

THIRD SCHEDULE.
Computation of Premiums.

1. THe amount of the premium payable on the conversion of any existing securities shall be equal to the product obtained by multiplying the following factors, namely :-
(a) The difference between one year's interest on the amount of principal secured by the existing securities at the rate payable thereon immediately before the date of conversion and one year's interest on the same amount at the rate payable on the new securities; and
(b) The appropriate factor specified in the Table of Factors hereinafter set out, according to the period between the date of conversion and the maturity date of the existing securities.
2. For the purpose of computing any such period as is mentioned in paragraph (b) of the last preceding clause, any fraction of a half-year that is not less than three months shall be counted as a half-year, and any such fraction that is less than three months shall not be taken into account.

## Example of Working.

Conversion as from 15 th December, 1933 , of 6 per cent. securities for $£ 100$, maturing 14th January, 1947, into $4 \frac{1}{4}$ per cent. securities.

Interest rate on existing securities (as reduced by Part 1 of the Act) is $4 \frac{4}{5}$ per cent. per annum.

One year's interest on $£ 100$ at existing rate ( $4 \frac{4}{5}$ per cent.) is $. . \quad . \quad 4 \cdot 8$
One year's interest on $£ 100$ at new rate ( $4 \frac{1}{4}$ per cent.) is .. .. $4 \cdot 25$

$$
\text { Difference is .. .. .. .. .. .. } £ 0 \cdot 55
$$

Period from date of conversion ( 15 th December, 1933) to existing maturity date ( 14 th January, 1947) is 13 years 30 days, counted as 13 years.

Factor for 13 years is $9 \cdot 761556$.
$£ 0.55$ multiplied by 9.761556 is $£ 5.3688558$, or $£ 57 \mathrm{~s} .4 \mathrm{~d}$., which is the premium for $£ 100$ of the existing securities.

The premiums on other amounts of existing securities of the same class can be computed in the same way, or alternatively, by ascertaining $5 \cdot 3688558$ per cent. of the amount of the principal in each case.
F. D. THOMSON,
(T. 49/114/1.)

Clerk of the Executive Council.
