Notes on the Weather for March, 1936.

Notes on the Weather for March, 1936. • General.—March was a cold month with several very stormy periods. Over much of the North Island there was a dearth of sunshine, and while the South had an ample amount its effects were largely offset by the cold winds. Though not nearly so much so as February, the month was a wet one in most districts, and there are few in which the soil is really dry. Vegetation is very green, but growth has not been vigorous and fruiting and flowering processes have been checked. Feed is abundant and stock are reported to be in good condition. Pastures are, however, rank and soft, and lambs still fail to fatten well. The management of pastures in the winter promises to be difficult and the effect of parasites is feared. The milk yield appears, on the whole, to be well maintained, though in Taranaki cold winds had a deleterious effect. Little progress has been made with the harvesting of the wheat crop, much of which is now in the stack. In Canterbury there was considerable sprouting of both standing and stocked wheat. The situation regarding root-crops varies considerably from district to district, growth being poor and pests numerous in some, while in others the reports are favourable. Supplies of feed for the winter, however, seem fairly well assured. A certain amount of haymaking still continued in the North Island. White butterflies are numerous in many places. *Rainfall*.—Rainfall was again very heavy in the northern portion of the Auckland Peninsula. It was much above normal also in the Bay of Plenty, East Coast, south central regions, and the South Taranaki Bight. Elsewhere in the North Island it was below normal. In the South Island conditions were variable in western districts and about the main ranges generally, but elsewhere the month was a very wet one. Large areas of Canterbury had three times the average fall. *Temperature*.—Temperatures were everywhere below normal. In the far North the departures were small, but they increased to the southward and were

near Tauranga on the 3rd.

near Tauranga on the 3rd. Following this, an intense anticyclone moved on to the Dominion and fine weather ruled for several days. On the night of the 6th to 7th, however, a depression moved from the north to the vicinity of East Cape and, though shallow, it caused very heavy rain between Hawke's Bay and East Cape and, in places, severe flooding. Following the passage of an innocuous depression on the 7th, pressure again fell rapidly to the east of New Zealand on the 8th and continued low until the 11th. Gales from between west and south were experienced at many places, and heavy rain was almost general. The falls were particularly heavy in eastern districts of the South Island and widespread floods occurred; Canterbury and Banks Pensinsula fared the worst. There were heavy snowfalls on the high levels.

Heavy rain again fell over the South Island in connection with a depression which moved on to the Dominion during the 20th and 21st. Though vigorous at first this depression lost energy when a cyclone moved down from the north and, keeping to the eastward, passed near Chatham Islands. On the 25th a deep cyclone, which had first appeared off the Queensland coast on the 18th, passed Norfolk Island on the westward side and on the 26th was centred near Cape Maria van Diemen. Moving in a south-easterly direction it was centred off East Cape on the morning of the 27th and soon moved away. It was responsible for very severe gales and remarkably high tides from Auckland northwards, and much damage was done. Heavy rain was recorded over most of the North Island, but the amounts, nevertheless, were surprisingly small for so deep and slow-moving a cyclone. From the 28th until the end of the month a westerly depression followed by a series of secondaries caused a second series of westerly or south-westerly gales which were severe in many places. On the 29th a tornado of unusual size for New Zealand did considerable damage at Greymouth. There were heavy rains in western districts of the South Island.
