IV. SYLLABUS FOR INSTRUCTION OF MEDICAL OFFICERS.

(New Zealand Naval Reserve Regulations (Officers), 1936, Article 136.)

The following is a syllabus for the instruction of Medical Officers, R.N.V.R., appointed for naval training in H.M. Ships and Establishments.

2. It has been drawn up on broad general lines as a basis for instruction, to be modified as necessary to meet the needs of each officer according to his previous experience.

3. Training in a naval hospital (or sick quarters) which is entirely a medical establishment is left to the discretion of the Medical Officer in Charge, but will, as far as the facilities available permit, include—

- (a) The routine of ward work.
- (b) The admission and discharge of patients.
- (c) The dieting of hospital patients.
- (d) The examination of recruits.
- (e) The method of keeping and rendering returns.
- (f) General health of staff (officers, nurses, and men).

Syllabus.

(1) Method of preparing Dressing-station: Selection of site. Division and separation of medical stores, stowage of emergency stores below the water-line. Provision of secondary lighting. Access to water-supply. Method of slinging bamboo stretchers in tiers. Drawing of emergency bedding.
