NEW ZEALAND GOVERNMENT RAILWAYS

## **ALTERATIONS**

TO THE

## SCALES OF CHARGES

Alterations to the Scales of Charges Upon the New Zealand Government Railways

PURSUANT to the Government Railways Act 1949, the New Zealand Railways Commission hereby makes the following alterations to the General Scale of Charges made on the 26th day of March 1952, and published in the Supplement dated the 9th day of April 1952 to the New Zealand Gazette of the 3rd day of April 1952, in force on the New Zealand Government Railways.

#### GENERAL SCALE OF CHARGES

The following alterations to the General Scale of Charges shall come into force on the 6th day of March 1955.

Cancel Regulations 68, 69, 70, and 71 and substitute the following:

#### GOODS, LIVE-STOCK, PARCELS, AND LUGGAGE

#### 68. Classification of Goods, Live-stock, etc.

- 1. Except as may be otherwise provided, goods specifically named or described in the following classification will be charged for carriage by railway at the rates for the specified class (where stated), such rates being set forth in Regulation 69.
- 2. Goods not specifically named or described in the following classification will, except as otherwise provided, be charged for carriage by railway at the rates prescribed by Regulation 69 for goods of Class C.
  - 3. Goods other than-

  - (a) Those chargeable at Class C rate pursuant to paragraph 2 of this regulation and not described as being at "owner's risk" in the Local Rates Scale of Charges; and
    (b) Those specified in the following classification as chargeable at Class C rate, Class C rate plus a prescribed increase, Class D rate, Class E rate plus a prescribed increase, or Class G rate and not described as being at "owner's risk" either in the following classifications or elsewhere in the General Scale of Charges or in the Local Rates Scale of Charges—

shall, unless a request is made that such goods be received, held, carried, delivered or otherwise dealt with at the risk of the Department under and subject to the provisions of Regulation 110, be received, held, carried, delivered or otherwise dealt with at the sole risk in every respect whatsoever of the owner. (For regulations regarding the carriage of "owner's risk" goods at the risk of the Department, see Regulation 110).

4. The word "dangerous" used in relation to goods denotes that the goods will be conveyed under the regulations applicable to explosives and dangerous goods.

Class

Acids, not otherwise specified. Dangerous		C. Double rate
Acid, acetic, boracic, citric, cresylic, formic, oleic, olive, phosphoric, sulph	urous,

#### GOODS-continued

#### 70. Computation of Charges

- 1. In computing the charges on goods, the following provisions will apply:
- (a) Except as otherwise provided, goods from different consignors to one consignee, or from one consignor to different consignees, will be charged separately.
- (b) A package containing different rated commodities will be charged the rate applicable to the highest rated commodity.
- (c) Small lots of goods of classes C, D, E, and G including goods chargeable at such rates subject to a percentage increase or decrease will be charged as per Regulation 71. Such classes of goods in quantities exceeding 5 cwt. will be subject to a minimum charge as for 5 cwt. as per Regulation 71.
- (d) Except where otherwise specified, any consignment consisting of two or more commodities chargeable at different rates will be charged separately; provided that goods of classes C, C plus 20%, or D not exceeding 5 cwt. in total weight may be grouped for charging purposes.
- (e) Timber and/or all goods chargeable on weight consigned from one consignor to one consignee, loaded in the same wagon, may be grouped for the purpose of the minimum load per wagon, and the charges at the appropriate local or classified rate may be based on the actual weight of each commodity (minimum charge as per Regulation 71) under the following conditions:
  - (i) The total weight charged for will not be less than the highest minimum weight specified for any commodity included in the consignment.
  - (ii) When the actual aggregate weight of all the commodities in the consignment is less than the highest minimum weight the weight required to make up the minimum will be charged at the rate applicable to the lowest rated commodity in the consignment.
  - (iii) For the purpose of this subparagraph timber will be calculated as 450 superficial feet to the ton.
- (f) Where local rates are in operation, and the sum of the charges computed separately at local rates or at local rates and classified rates (as the case may be) is lower than the amount of charges computed at the through classified rate, the lower charges as so computed shall apply.

The following examples are given by way of illustration but are not exhaustive:

- Let A, B, C, and D be stations in that order on a continuous line of railway with local rates in operation between A and B and between B and C respectively.
  - Case 1. Consignment from A to B or from B to C: Local rate supersedes classified rate in each case.
  - Case 2. Consignment from A to C would be charged at the cheapest of the following computations:
    - (i) Both local rates.
    - (ii) Either local rate and the classified rate for the balance of the journey.
      (iii) The through classified rate.
  - Case 3. Consignment from A to D would be charged at the cheapest of the following computations:
    - (i) Local rate A to B and B to C and classified rate C to D.

    - (ii) Local rate A to B and classified rate B to D.
      (iii) Classified rate A to B, local rate B to C, classified rate C to D.
    - (iv) Through classified rate A to D.
- Let X, Y, and Z be stations in that order on a continuous line of railway with a local rate in operation between X and Z.
  - A consignment from X to Y would be charged at the cheaper of the following computations
    - (i) Local rate X to Z and classified rate Z to Y.(ii) Through classified rate X to Y.
- 2. Goods Subject to an Increase in Rate.—Where it is prescribed that the rate for any goods will be subject to a percentage or other increase, the appropriate rate will, subject to the following provisions, be so increased:
  - (a) Classes C and D goods subject to a percentage or other increase chargeable on actual weight at a local rate which exceeds the classified rate
  - (b) Goods chargeable on actual cubic measure-
- The increase will not apply to the local rate but the charges will not be less than if computed at the classified rate plus the increase.
- The increase will not apply (except on dangerous goods).

### GOODS-continued

#### 70. Computation of Charges-continued

- 3. Goods Subject to a Reduction in Rate.—Where it is prescribed that the rate for any goods will be subject to a percentage or other reduction, the appropriate rate will, subject to the following provisions, be so reduced:
  - (a) Class D goods chargeable on weight where
  - the local rate exceeds the classified rate
    (b) Goods chargeable on weight at a local rate which does not exceed the classified rate
  - (c) Goods chargeable on actual cubic measurement at a local rate
- The charges will be computed at the classified
- rate less the reduction.

  The charges will be computed at the classified
- rate less the reduction if cheaper than at the local rate with no reduction.

  The reduction will not apply in the case of ships' goods on port lines (See Regulation 1977)
- 4. Minimum Quantity.—Where a rate is specified as being for a minimum quantity and such minimum is not complied with, it shall be permissible to charge as for the minimum quantity at the rate so specified if cheaper.
- 5. Alternative Charge.—Wherever an alternative charge is specified, it is intended that the lower charge will be taken, unless otherwise provided.

- 6. Goods Chargeable on Weight or Measurement.—(a) All goods chargeable on weight will be charged on the actual gross weight (avoirdupois) of the goods when received by the Department for carriage.

  (b) When goods are packed for carriage, the weight or measurement of the consignment will include the weight or dimensions of the case or packing used, provided that the charges shall not be less than for such case or packing when consigned alone.

  (c) Except when inconsistent with the context or otherwise expressly stated "measurement" means cubic measurement. Whenever charges are based on measurement and are to be computed at a rate per unit of weight, such measurement shall be converted into weight at the rate of 40 cubic feet to the ton. to the ton.
- 7. Bogie Wagon Rate.—Except where otherwise specified, a rate per wagon refers to a four-wheeled wagon, and except as aforesaid, a bogie wagon will, in computing charges at a rate per wagon, be charged at twice the rate for a four-wheeled wagon. See also Regulation 106
- 8. Insulated Wagons.—Where an insulated wagon is specially ordered and supplied for the conveyance of goods, the charges will be computed on a minimum weight of 30 cwt. in respect of each four-wheeled insulated wagon.
- 9. Frozen or Chilled Goods Consigned to a Port or Wharf for Export.—The railage or haulage charges as the case may be, will be computed on the following minimum weights:

T 1 / 1 337			2011
Insulated WA wagon	 	 	$3\frac{1}{2}$
Insulated W wagon	 	 	$4^{-}$
Insulated V or Fv wagon	 	 	8
Insulated VB wagon	 	 	11

The minimum loads per wagon of frozen or chilled goods will be deemed to be complied with in ane minimum loads per wagon of trozen or chilled goods will be deemed to be complied with in cases where the total tonnage forwarded by any one consignor for one complete shipment is not less than the total capacity of all the wagons used, based on the prescribed minimum of each wagon. In cases where the Department for its convenience supplies wagons having a total minimum capacity greater than the classes of wagons ordered by the consignor for any one shipment, the charges will be based on the appropriate minimum loads of the classes of wagons ordered.

10. Goods Booked Between Two Separate Sections of Railway.—The charges for each section will be computed separately.

GOODS—continued

71. Small-lots Scale

1. Except as otherwise provided, the charges for small lots of goods shall be as follows:
