NEW ZEALAND GOVERNMENT RAILWAYS

ALTERATION TO THE SCALE OF CHARGES

Alterations to the Scales of Charges Upon the New Zealand Government Railways

GENERAL SCALE OF CHARGES

PURSUANT to the Government Railways Act 1949, the Minister of Railways hereby fixes the following scales of charges and hereby imposes the following terms and conditions in respect of sections 68 to 71 inclusive of the General Scale of Charges in force on the New Zealand Government Railways; and hereby declares that such scales of charges and such terms and conditions shall come into force on the 1st day of September 1971, on which date the scales of charges, terms and conditions previously fixed or imposed in respect of the said sections 68 to 71 inclusive shall be revoked.

GOODS AND LIVESTOCK

68. Classification of Goods, Livestock, etc.

1. Except as may be otherwise provided, goods will be charged for carriage by railway in accordance with the classification set out in paragraph 4 hereof, that is to say—
Goods for which a class is shown will be charged at the rates prescribed by section 69 for the specified class and goods named in the said paragraph 4 for which no class is shown will be charged at the rates prescribed by the section specified.
With the exception of used empty containers, articles already classified in section 68 which

are manufactured from plastic or perspex will be charged in accordance with the classification applicable to plastic or perspex.

2. (a) All goods described in the following classification or elsewhere in this General Scale of Charges or in the Local Rates Scale of Charges as being at "owner's risk"; and (b) All goods other than those classified in paragraph 4 hereof as Class "C" or Class "C" plus a prescribed increase, or Class "D", or Class "E" plus a prescribed increase, or Class "G", or Class "P" plus a prescribed increase, shall, unless a request is made that such goods be received, held, carried, delivered or otherwise dealt with at the risk of the department under and subject to the provisions of section 110, be received, held, carried, delivered or otherwise dealt with at the sole risk in every respect whatsoever of the owner. otherwise dealt with at the sole risk in every respect whatsoever of the owner.

3. The word "dangerous" used in relation to goods denotes that the goods will be conveyed under the regulations applicable to explosives and dangerous goods.

70. Computation of Charges

- 1. In computing the charges on goods, the following provisions will apply:
 - (a) Except as otherwise provided, goods from different consignors to one consignee, or from one consignor to different consignees, will be charged separately.
 - (b) A package containing different rated commodities will be charged the rate applicable
 - to the highest rated commodity.

 (c) Small lots of goods of Classes C, D, E, and G including goods chargeable at such rates subject to a percentage increase or decrease will be charged as per section 71. Such classes of goods in quantities exceeding 5 cwt will be subject to a minimum charge as for 5 cwt as provided in section 71, but the additional charge of 25c referred to in paragraph 2 thereof will not be levied.
 - (d) Except where otherwise provided the weights of two or more commodities in any consignment chargeable at the same rate may be grouped for charging purposes, but two or more commodities chargeable at different rates must be charged separately, provided that goods of classes C, C plus 20%, D or D less 25% not exceeding 5 cwt in total weight may be grouped for charging purposes.

 (e) Timber and/or all goods chargeable on weight consigned from one consignor to one consignee, loaded in the same wagon, may be grouped for the purpose of the minimum load per wagon, and the charges at the appropriate local or classified
 - rate may be based on the actual weight of each commodity (minimum charge as per section 71) under the following conditions:
 - (i) The total weight charged for will not be less than the highest minimum
 - weight specified for any commodity included in the consignment.

 (ii) When the actual aggregate weight of all the commodities in the consignment is less than the highest minimum weight the weight required to make up the minimum will be charged at the rate applicable to the lowest rated commodity in
 - the consignment. (iii) For the purpose of this subparagraph timber, will be calculated as 450 superficial feet to the ton.
- 2. Goods Subject to an Increase in Rate—Where a local rate for Class C goods applies, charges for goods of classes C plus 20%, C plus 50%, or C double rate are to be computed as follows
 - (a) If goods are chargeable on weight, the appropriate increase is to be applied to the local rate.
 - (b) If goods are chargeable on measurement the local rate is not to be increased.
- 3. Goods Subject to a Reduction in Rate—Where it is prescribed that the rate for any goods will be subject to a percentage or other reduction, the appropriate rate will, subject to the following provisions, be so reduced:
 - fied rate
 - (b) Goods chargeable on weight at a local rate which does not exceed the classified rate
- (a) Class D goods chargeable on weight where the local rate exceeds the classified rate less the reduction.
 - The charges will be computed at the classified rate less the reduction if cheaper than at the local rate with no reduction.
- (c) Goods chargeable on actual cubic The reduction will not apply in the case of measurement at a local rate Ships' goods on port lines (see Section 127). ships' goods on port lines (see Section 127).
- 4. Minimum Quantity—Where a rate is specified as being for a minimum quantity and such minimum is not complied with it shall be permissible to charge as for the minimum quantity at the rate so specified if cheaper.
- 5. Alternative Charge—Wherever an alternative charge is specified it is intended that the lower charge will be taken, unless otherwise provided.
- 6. Goods Chargeable on Weight or Measurement—(a) All goods chargeable on weight will be charged on the actual gross weight (avoirdupois) of the goods when received by the department for carriage.
- (b) When goods are packed for carriage, the weight or measurement of the consignment will include the weight or dimensions of the case or packing used, provided that the charges shall not be less than for such case or packing when consigned alone.
- (c) Except when inconsistent with the context or otherwise expressly stated "measurement" means cubic measurement. Whenever charges are based on measurement and are to be computed at a rate per unit of weight, such measurement shall be converted into weight at the rate of 40 cu ft to the ton.
- 7. Bogie Wagon Rate—Except where otherwise specified, a rate per wagon refers to a four-wheeled wagon, and except as aforesaid, a bogie wagon will, in computing charges at a rate per wagon, be charged at twice the rate for a four-wheeled wagon. See also section 106.
- 8. Explosives—(a) Except as otherwise provided, goods of an explosive nature not permitted to be conveyed in wagons containing ordinary goods will be subject to an additional charge of \$1 per consignment (irrespective of the quantity or the distance hauled).

 (b) Exception: The surcharge will not apply to small consignments of explosives which are
- railed in portable magazines. However, where the department is unable to supply a portable magazine on request and the consignor elects to load the consignment in a wagon the surcharge will apply.
- 9. Goods Booked Between Two Separate Sections of Railway—The charges for each section will be computed separately.

71. Small-lots Scale

1. Except as otherwise provided, the charges for small lots of goods will be: (a) Goods classified as Class C, D, C plus 50%, and E plus 50%.
