36.5 Owner's risk

The foregoing rates are at "limited carriers risk" and will be reduced by 2 percent where consignments require that the consignment be carried at "owner's risk".

Clause 37 (p. 2280) omit this clause and substitute:

37 CHARGING UNIT

37.1 Basis for charging

Goods charges according to clauses 34, 35 and 36 are to be charged at the greater of the mass (or weighing machine weight) or the dimensional weight.

37.2 Dimensional weight

The dimensional weight is to be calculated from the cubic measurement in cubic metres multiplied by a kilogram per cubic metre allowance.

37.2.1 Intra-Island

Movements within an Island shall have an allowance of 333 kilograms per cubic metre.

37.2.2 Inter-Island

Movements inter-Island shall have an allowance of 625 kilograms per cubic metre.

37.3 Documentation

All consignments of up to 5000 kilograms or 15 cubic metres shall have the cubic volume specified in cubic metres on the consignment note submitted to the Corporation. In the absence of this requirement being met, the Corporation reserves the right to estimate the cubic volume and to calculate charges accordingly.

37.4 Measurement

37.4.1 Calculation

Cubic volume shall be calculated as the product of the linear measurement of a package taken between the maximum extremities in three directions at right angles to each other. This means that the cubic volume is found by multiplying the length by the breadth by the height.

37.4.2 Displacement volume

A displacement cubic volume calculation method is not to be used, meaning that consignments are to be squared off for calculation purposes. The Corporation may exercise its discretion in the case of unusual package shapes which can be overstowed.

37.4.3 Unpacked consignments

Where inadequate packaging precludes overstowing, the Corporation reserves the right to calculate the cubic volume as if the package is 2.4 metres in height.

37.4.4 Packaging

Cubic volume calculations shall include any packaging, cases, pallets or containers.

37.4.5 Gross weight
